**Notice of Competitive
Geothermal Internet Lease Sale**

In accordance with the *Geothermal Steam Act*, the *Energy Policy Act of 2005*, and the BLM regulations at 43 CFR 3200, the Bureau of Land Management (BLM) is offering 35 parcels containing 113,330.520 acres in the State of Idaho for internet-based competitive geothermal leasing. This notice describes:

- The date, time and place of the sale;
- How to participate in the bidding process;
- The sale process;
- The conditions of the sale; and
- How to file a noncompetitive offer after the sale.

Attached is a list of lands we are offering by parcel number, and land description. We have included any stipulations, lease notices, or special conditions that will be made a part of the lease at the time we issue it. We have also identified those parcels where the United States owns less than 100% interest in the geothermal mineral rights.

For your convenience, additional sale documentation is located on <https://nflss.blm.gov/s/>

When and where will the sale take place?

When: The sale date is November 17, 2026. The open bidding period will begin at 9:00 a.m. Mountain Standard Time (MST) / 10:00 a.m. Central Standard Time (CST). Each parcel will have its own unique open bidding period, with start and stop times clearly identified on the auction website. The open bidding period for each parcel will run for one hour, from start to finish, and bids will only be accepted during a parcel's open bidding period.

Receipts for all successful bidders will be receipted on the same day the parcel opens and closes. All payment requirements as stated in the Payment Due Section of this Notice will pertain to the parcels on the day they were sold. For payment requirements see Payment Due section of this Notice.

Where: The sale is held online at <https://app.efficientmarkets.com/government-listings>. Parcels may be viewed online at the Efficient Markets website approximately 10 business days after the posting of this Notice of Competitive Geothermal Internet-Based Lease Sale on the National Fluids Lease Sale System (NFLSS) website at <https://nflss.blm.gov/s/>.

Access: The auction website is open to the public. The internet-based lease sale can be observed in real-time. However, you must register as a bidder on the website, in advance, in order to submit bids for a parcel. The auction website will be active and available for use approximately 10 days after the date of this Notice of Competitive Lease Sale and will remain available for viewing until the completion of the auction. The available parcels listed in this Notice will be detailed on the website. Interested parties may visit the website at any time.

Potential bidders may register for the online auction as soon as the auction website is active. Further, potential bidders are encouraged to visit the website prior to the start of the open bidding period to become familiar with the site and review the bidding tutorial. Supporting documentation is available on the website to familiarize new users with the process and answer frequently asked questions.

How will the sale be conducted?

The sale will be conducted ***by online bidding only***. The online auction will be a sequential, ascending clock, fixed period, English auction. Each parcel will have its own unique open bidding period, with start and stop times clearly identified on the auction website. The open bidding period for each parcel will run for one hour, from start to finish. Bids will only be accepted for each parcel during its open bidding period. Each parcel will close bidding sequentially so that each bidder will know if they are the highest winning bid before subsequent parcels close. The website will display each current high bid, and the high bid bidder's number. The winning bid is the highest bid per acre received, equal to or exceeding the minimum acceptable bid, which is on record in the online auction system by the close of the auction period.

The online system allows participants to submit maximum bids to enable a bidder to participate in the online auction without having to be logged into the website at the time the auction period closes. The auction website provides a full explanation of placing maximum bids, as well as an explanation of how they work to place bids on your behalf to maintain your high bidder status up to the chosen maximum bid amount. The BLM strongly encourages potential bidders to review the bidding tutorial, in the Frequently Asked Questions area on the auction website in advance of the online lease sale.

How do I participate in the bidding process?

To participate in the BLM bidding process, you must register and obtain a bidder number. A participant can register to bid at the auction website <https://app.efficientmarkets.com/government-listings> approximately 10 days after posting of this Notice on the NFLSS website. Participants are encouraged to register early to familiarize themselves with the bidding instructions and ensure they have ample time to complete all of the required registration steps before the open bidding period commences.

If an entity is bidding for more than one party, they **must register separate credentials**, satisfy all registration requirements and **obtain a separate bidder number for each company or individual** they wish to represent.

You do not have to be “present” in the auction in order to participate as a bidder. The online auction provides a “maximum bid” bidding option. By using this “maximum bid” option, you are asking the system to bid automatically on your behalf, up to an amount you specify.

When registering as a bidder on the auction website, you will also be asked to sign a statement to confirm that any bid you cast will represent a good-faith intention to acquire a geothermal lease and that you understand that any winning bid will constitute a legally binding commitment to accept the terms of the lease and pay monies owed. Further, you will acknowledge, through self-certification of the enhanced bidder form, that you understand that it is a crime under 18 U.S.C. 1001 and 43 U.S.C. 1212 to knowingly and willfully make any false, fictitious, or fraudulent statements or representations regarding your qualifications; bidder registration and intent to bid; acceptance of a lease; or payment of monies owed; and that any such offense may result in a fine or imprisonment for not more than 5 years or both. You will also acknowledge that you understand that it is a crime under 30 U.S.C. 195 (a) and (b) to organize or participate in any scheme to defeat provisions of the mineral leasing regulations. Any person who knowingly violates this provision will be punished by a fine of not more than \$500,000, imprisonment for not more than 5 years, or both.

If you, or the party you represent, owe the United States any monies that were due the day of a previous geothermal lease auction conducted by any BLM office (the minimum monies owed the day of sale), or any monies owed Efficient Markets for a previous geothermal lease auction conducted by Efficient Markets for any BLM office, you will not be allowed to register to bid at this lease sale.

The Geothermal Steam Act of 1970 requires that leases be issued to a “responsible qualified bidder” (30 U.S.C. 1003(b)(1)). Any bidder, or party represented by a bidding agent, that does not pay the minimum monies owed the day of the sale is not a “responsible qualified bidder” and will be barred from participating in any geothermal lease auction nationwide until the bidder settles that debt to the United States. In addition, if you or the party you represent defaults at any three sales conducted by any BLM office, you or the party you represent will be barred permanently from participating in any other BLM geothermal lease sale auction.

Provisions Pertaining to Certain Transactions by Foreign Persons Involving Real Estate in the United States

The Office of Investment Security, Department of the Treasury issued a final rule, **effective February 13, 2020**, establishing regulations to implement the provisions relating to real estate transactions in section 721 of the Defense Production Act of 1950, as amended by the Foreign Investment Risk Review Modernization Act of 2018. The final rule was published at 85 Fed. Reg. 3158 (Jan. 17, 2020) and codified at 31 CFR part 802.

The new rule sets forth the process relating to the national security review by the Committee on Foreign Investment in the United States (CFIUS) of certain transactions, referred to in the rule as “covered real estate transactions,” that involve the purchase or lease (including an assignment or other transfer) by, or concession to, a foreign person of certain real estate in the United States. Covered real estate transactions could include some transactions involving the Federal mineral estate.

The CFIUS looks not only at the entities that are lessees, but also to any [legal] person with the ability to exercise control, as defined by the statute and its implementing regulations, over the lessee. CFIUS is authorized to review covered real estate transactions and to mitigate any risk to the national security of the United States that arises as a result of such transactions. This could result in the modification, suspension, or prohibition of a lease or interest therein.

Accordingly, BLM recommends that each potential bidder, lessee, or [other] interest holder review the final rule before bidding on or acquiring an interest in a Federal oil and gas lease.

For further information, please refer to the CFIUS page:

<https://home.treasury.gov/policy-issues/international/the-committee-on-foreign-investment-in-the-united-states-cfius>

What is the sale process?

Starting at the posted opening date and time for each parcel:

- A block will be auctioned as one unit and all parcels within the block will receive the same high bid as the block. If the block receives no bids, the parcels will be offered individually.
- All bids are on the gross (total) per-acre basis, rounded up to whole acres, for the entire acreage in the parcel;

- All bids are made in minimum increments of \$1.00 per acre, or fraction of an acre thereof;
- The winning bid is the highest received bid, equal to or exceeding the minimum acceptable bid, which is on record in the online auction system at the close of the auction period; and
- **The decision of the BLM, as presented on the auction website's bid history at <https://www.efficientmarkets.com/>, is final.**

The minimum acceptable bid is \$2 per acre. If a parcel contains fractional acreage, round it up to the next whole acre. For example, a parcel of 100.51 acres requires a minimum bid of \$202 (\$2 x 101 acres).

You cannot withdraw a bid once a bid is placed and the auction system determines that you are the high bidder.

How long will the sale last?

Each parcel will have its own unique open bidding period, with start and stop times clearly identified on the auction website. The open bidding period for each parcel will run for one hour, from start to finish. The length of the sale depends on the number of parcels we are offering.

What conditions apply to the lease sale?

- **Parcel withdrawal or sale postponement:** We reserve the right to withdraw any or all parcels before the sale begins. If we withdraw a parcel, we will post a notice in the Idaho State Office Information Access Center (Public Room) before the sale begins. Additionally, the auction website will clearly indicate that a parcel is withdrawn. If we postpone the sale, a clear notice will be posted in the Idaho State Office Information Access Center, the NFLSS website at <https://nflss.blm.gov/s/>, and on the auction website.
- **Fractional mineral interests:** 43 CFR 3206.15 If the United States owns less than 100 percent of the geothermal mineral interest for the land in a parcel, we will show that information as part of the parcel listing. When we issue the lease, it will be for the percentage or fraction of interest the United States owns. However, you must calculate your bonus bid and advance rental payment on the gross (total) acreage in the parcel, not the United States net interest. For example, if a parcel contains 199.31 acres and the United States owns 50 percent of the geothermal mineral interest, the minimum bonus bid will be \$400 (\$2 x 200 acres) and the advance annual rental will be \$400 (\$2 x 200 acres) for the first year and \$600 (\$3 x 200 acres) for the remainder of the lease term. Conversely, your chargeable acreage and royalty on production will be calculated on the United States net acreage.

- **Payment due:** You cannot withdraw a bid. Your bid is a legally binding contract. For **each parcel** you are the successful high bidder, on the day the parcel closes you must pay 20 percent of the bonus bid; the first year's advance rental of \$2 per acre or fraction of an acre; and a non-refundable administrative fee of \$205.00. These are monies you owe the United States, whether or not a lease is issued.

You must provide notification of the payment process of these monies to the BLM Idaho State Office prior to 4:00 p.m. (MST), the day the parcel closes, confirmation (via email or fax) that the payment for the parcel(s) has been initiated and the type of payment method. Payment will be made directly to the BLM Idaho State Office, or as otherwise directed by the BLM. **Payments to the BLM will not be made through the auction website.** At the conclusion of each parcel's bidding period, the winning bidder will be provided instructions by the online auction system on how to make the required payment to the BLM. The winning bidder will be required to pay the buyer's premium to Efficient Markets, 1.5% of any successful bonus bid plus the first year's rental before the BLM will issue a lease.

If your bonus bid was more than \$2 per acre or fraction of an acre and you do not pay the full amount on the day of the sale for the parcel, you must pay any balance due by the close of business on the 15th calendar day after the last day of the internet-based auction closes. **Remaining balance will be due in the Idaho State Office by 4:00 p.m. Mountain Standard Time, December 2, 2026. If you do not pay in full by this date, you lose the right to the lease and all money paid the day of the sale.** If you forfeit a parcel, we may offer it again at a future sale.

The minimum monies owed on the day of the sale for a winning bid are monies owed to the United States [43 CFR 3203.17]. If we do not receive notification of the payment process for the minimum monies owed the day of the sale by the date and time above, the BLM will continue to pursue collection by issuing a bill for the monies owed and your offer will be rejected. If we do not receive payment by the bill due date, we will send a demand letter to you that will include additional fees. If we do not receive payment as requested by the demand letter, the U.S. will immediately pursue collection by all appropriate methods, and when appropriate, collect late fees, interest, administrative charges, and on past-due amounts assess civil penalties. "All appropriate methods" include, but are not limited to, referral to collection agencies and credit reporting bureaus; salary or administrative offset; offset of Federal and state payments, including goods or services; and Federal and state tax refund offset; and retirement payment offset. We may send debts to the Internal Revenue Service (IRS) and the IRS may charge them as income to you on Form 1099C, Cancellation of Debt (Federal Claims Collection Act of 1966, as amended; The Debt Collection Improvement Act of 1996; 31 CFR Part 285).

- **Forms of payment:** Specific payment instructions will be provided by the online auction system to winning bidders. You may pay by:

- Electronic Funds Transfer (EFT);
- Automated Clearing House (ACH); and/or
- Credit card (Discover, Visa, American Express, or MasterCard only).
- We cannot accept cash.

In order to meet the payment requirement, you must provide BLM contacts with confirmation that the transaction has been initiated on the day the parcel closes before 4:00 p.m. (MST) / 5:00 p.m. CST. An email or fax containing confirmation must include, but is not limited to, the following appropriate documents: overnight shipping tracking document, a copy of the payment instrument, and/or a bank provided electronic confirmation of EFT or ACH. **Do not email or fax privacy information such as account numbers.**

Please note, in accordance with the Department of Treasury Financial Manual, Announcement No. A-2014-04, the BLM cannot accept credit card payments for an amount equal to or greater than \$24,999.99. The BLM cannot accept aggregated smaller amounts to bypass this requirement. An amount owed that exceeds the maximum dollar amount for a credit card payment transaction may not be split into two or more payment transactions in the same day by using one or more credit cards. The BLM does not have Personal Identification Number (PIN) equipment for the purpose of processing PIN authorized debit cards. All debit card transactions will be processed as credit cards and the dollar value limits will apply.

If you plan to make your payment using a credit card, you should contact your bank prior to the sale to let them know that you will be making a substantial charge against your account. If the credit card transaction is refused, we will try to notify you early enough so that you can make other payment arrangements. ***However, we cannot grant you any extension of time to provide confirmation of payment to the BLM contacts.***

Please note, in accordance with Executive Order (E.O.) 14247, Modernizing Payments To and From America's Bank Account, signed on March 25, 2025, the BLM encourages individuals to make payments electronically, however the BLM will accept any payments made by personal check, cashier's check, bank draft, money order, or others means deemed acceptable by the BLM as outlined under 43 CFR 3203.17(a).

- **Bid form:** On the day of the sale, if you are a successful winning high bidder, you must submit (email or fax) to the applicable BLM State Office a properly completed and signed [competitive bid form](#) (Form 3000-2) and proof of the required payment. This form is a legally binding offer **by the prospective lessee** to accept a lease and all its terms and conditions. Once you sign the form, you cannot change it. The online auction system will provide the successful winning bidder with a fillable pdf of this bid form and instructions on how to submit the form to the Idaho State Office after the auction. We will not accept any bid form that has information crossed out or is otherwise altered. **We will not issue a lease until we receive a signed copy of the bid form in accordance with 43 CFR 3202.11.**

You will be shown the bid form as part of the bidder registration process and asked to certify that you will complete and execute it should you be the successful winning high bidder. We ask that you complete the form at this time to ensure you can meet this condition.

Your completed bid form certifies that:

1. You and/or the prospective lessee are qualified to hold a geothermal lease under our regulations 43 CFR 3202.11; and
2. Both of you have complied with 18 U.S.C. 1860, a law that prohibits unlawful combinations, intimidation of, or collusion among bidders.

This Notice includes a copy of the bid form, and again, you will be provided a copy during the bidder registration process and asked to assert that you agree that you will be able and willing to comply and sign it if you are the winning bidder at the close of the auction.

- **Federal acreage limitations:** Qualified individuals, associations, or corporations may only participate in a competitive lease sale and purchase Federal geothermal leases from this office if such purchase will not result in exceeding the state limit of 51,200 acres (public domain and acquired land combined) (43 CFR 3206.13).

For the purpose of chargeable acreage limitations, you are charged with your proportionate share of the lease acreage holdings of partnerships or corporations in which you own an interest greater than 10 percent. Lease acreage committed to a unit agreement, communitization agreement or development contract that you hold, own or control and was paid in the preceding calendar year is excluded from chargeability for acreage limitation purposes. The acreage limitations and certification requirements apply for competitive geothermal lease sales, noncompetitive lease offers, transfer of interest by assignment of record title or operating rights, and options to acquire interest in leases regardless of whether an individual, association, or corporation has received additional time under 43 CFR 3206.13, to divest excess acreage acquired through merger or acquisition.

- **Lease Issuance:** After we receive the signed bid form and all monies due we can issue the lease. The lease is effective the first day of the month following the month in which we sign it. (43 CFR 3206.18)
- **Lease terms:** A lease issued as a result of this sale will have a primary term of 10 years. The BLM will extend the primary term of the lease if the requirements found in the regulations 43 CFR 3207.10 have been met. Annual rental is \$2 per acre for the first year (paid to the BLM), and \$3 per acre for the second through tenth year (paid to the Office of Natural Resources Revenue (ONRR)). After the tenth year, annual rental will be \$5 per

acre. Rental is always due in advance of the lease year. The ONRR must receive annual rental payments by the anniversary date of the lease year or your lease may be terminated. You will find other lease terms on our standard lease form (Form 3200-024a).

- **Split Estate:** Information regarding leasing of Federal minerals under private surface, referred to as “Split Estate,” is available at the following Washington Office website: <https://www.blm.gov/programs/energy-and-minerals/oil-and-gas/leasing/split-estate>. A Split Estate brochure is available at this site. The brochure outlines the rights, responsibilities, and opportunities of private surface owners and geothermal operators in the planning, lease sale, permitting/development, and operations/production phases of the geothermal program.
- **Stipulations:** Stipulations are part of the lease and supersede any inconsistent provisions of the lease form. They are requirements or restrictions on how you conduct operations. These stipulations are included in the parcel descriptions on the attached list.

All Federal geothermal lease rights are granted subject to applicable laws under Section 6 of the lease terms including requirements under the Endangered Species Act, as amended, 16 U.S.C. 1531 *et seq.* In accordance with Washington Office (WO) Instruction Memorandum (IM) No. 2002-174, each parcel included in this lease sale will be subject to the Endangered Species Act Section 7 Consultation Stipulation. In accordance with WO IM No. 2005-003, Cultural Resources and Tribal Consultation, for Fluid Minerals Leasing, each parcel in this sale will be subject to the Cultural Resource Protection Stipulation.

- **Unit and Communitization Agreements:** Parcels offered in this Notice may fall within an authorized Unit or Communitization Agreement. If the parcel falls within an authorized Unit or Communitization Agreement, the successful bidder may be required to join the agreement.

How do I file a noncompetitive geothermal offer after the sale?

Under regulations 43 CFR 3204, lands that do not receive a bid and are available a 2-year period, beginning the first business day after the auction. The noncompetitive offers are handled directly by the BLM and not through the internet leasing website. If you want to file a noncompetitive offer on an unsold parcel, you must file it in the appropriate State Office:

- Two copies of current form [3200-24a, Offer to Lease and Lease for Geothermal Resources](#) properly completed and signed. Describe the lands in your offer as specified in our regulations at 43 CFR 3203;
- \$535 nonrefundable administrative fee;

- First year advance rental (\$1 per acre or fraction thereof). Remember to round up any fractional acreage when you calculate the amount of rental; and
- Only one application per parcel may be submitted by the same applicant.

For 30 days after the competitive geothermal lease sale, noncompetitive applications will be accepted only for parcels as configured in the Notice of Competitive Geothermal Lease Sale. Subsequent to the 30-day period, you may file a noncompetitive application for any available lands covered by a competitive lease sale, not to exceed 5,120 acres per lease.

Submit the aforementioned items to the BLM Idaho State Office Information Access Center (Public Room) in person or by mail. We consider all offers filed the first business day following the last day of the auction, filed at the same time. If a parcel receives more than one offer, we will randomly select an application to determine the winner (43 CFR 1822.17). Offers filed after this time period receive priority according to the date and time of filing in this office.

How do I submit a geothermal nomination?

Geothermal nominations may be submitted via NFLSS at <https://nflss.blm.gov/s/>

Geothermal nominations may also be submitted on Form 3203-1, *Nomination of Lands for Competitive Geothermal Leasing* to the proper BLM State Office and comply with 43 CFR 3203. Please refer to these regulations for nomination requirements regarding maximum acreage, acceptable land descriptions, and nominating parcels as a block.

Nominations are not automatically placed on a sale when received, and the BLM cannot guarantee that the nominated lands will always be included on a particular sale notice. The parcels must be reviewed for availability, environmental and cultural concerns prior to being placed on a sale. Sale parcels will normally be configured as requested; however, BLM reserves the right to adjust the parcel size and configuration as needed.

Each nomination (whether submitted via NFLSS or via Form 3203-1) must be submitted with:

- \$150 nonrefundable administrative fee; and
- \$0.14 per acre Remember to round up any fractional acreage when you calculate the amount of rental.

When is the next competitive geothermal lease sale scheduled?

We have tentatively scheduled our next competitive sale for November 2027. We can make no guarantee as to when a given parcel will be offered for competitive sale. We will try to put nominations in the earliest possible sale.

How can I find out the results of this sale?

The sale results will be posted on the <https://www.efficientmarkets.com/about/government-sales-results/> website and the NFLSS website at <https://nflss.blm.gov/s/>. Paper copies are available for viewing or purchase at the BLM Idaho State Office Information Access Center.

Who should I contact if I have questions?

If you have questions on BLM stipulations, lease notices, etc., please contact the appropriate BLM Field Office for assistance.

If you have questions on another surface management agency's stipulations or restrictions, etc., please contact that agency.

For general information about the competitive geothermal lease sale process, or this Notice of Competitive Lease Sale, please call Judy Duenas at 208-373-3866, e-mail tduenas@blm.gov, or write to the address in our letterhead.

INSTRUCTIONS FOR OIL AND GAS OR GEOTHERMAL RESOURCES BID
(*Except NPR-A*)

1. Separate bid form for each lease/parcel or block is required. Identify by the serial/parcel number assigned in the *Notice of Competitive Lease Sale*.
2. Bid must be accompanied by the national minimum acceptable bid (oil and gas: \$10.00 per acre; geothermal: twenty percent of the total bid), the first year's rental (oil and gas: \$3.00 per acre; geothermal: \$2.00 per acre), and the administrative fee (see 43 CFR 3000.12). The remittance must be in the form specified: (1) for oil and gas leases in 43 CFR 3103.1-1; and (2) for geothermal resources leases in 43 CFR 3203.17. The remainder of the bonus bid, if any, must be submitted to the proper Bureau of Land Management (BLM) office within 10 working days for oil and gas, and 15 calendar days for geothermal, after the last day of the competitive auction. **Failure to submit the remainder of the bonus bid within the statutory (or regulatory) timeframe will result in rejection or revocation, as appropriate, of the bid offer and forfeiture of all monies paid.**
3. If the bidder is not the sole party in interest in the lease for which the bid is submitted, all other parties in interest may be required to furnish evidence of their qualifications upon written request by the BLM.
4. This bid may be executed (*signed*) before the competitive auction. If signed before the competitive auction, this form cannot be modified without being executed again. In view of this requirement, the bidder may wish to leave the AMOUNT OF TOTAL BID section blank so that final bid amount may be either completed by the bidder or the BLM at the close of the competitive auction.
5. See 2 CFR 180.995 for the definition of principals.

INSTRUCTIONS FOR OIL AND GAS:

NATIONAL PETROLEUM RESERVE--ALASKA (NPR-A)
SEALED BID

1. Separate bid form for each tract is required.
2. AMOUNT OF TOTAL BID must be in whole dollar figure. Bid must be accompanied by one-fifth of the amount of the bid. The remittance must be in the form specified in 43 CFR 3132 for a NPR-A lease bid.
3. Mark the envelope "Sealed Bid for NPR-A Oil and Gas Lease Sale". Be sure correct tract number on which the bid is submitted and date of bid opening are noted plainly on envelope. Use standard size envelopes not to exceed 4-1/2" x 10-1/2". No bid may be modified or withdrawn unless such modification or withdrawal is received prior to time fixed for opening of bids.
4. Mail or deliver bid to the proper BLM office or place indicated in the *Notice of Competitive Lease Sale*.
5. There is no limit to the number of joint bidders that may participate. If joint bidders is marked above, attach on a separate sheet the name and address of the additional bidders, percent of interest of each bidder (total of all bidders must equal 100%), and signature for each joint bidder.
6. See 2 CFR 180.995 for the definition of principals.

Title 18 U.S.C. Section 1001 and Title 43 U.S.C. Section 1212 make it a crime for any person knowingly and willfully to make to any Department or agency of the United States any false, fictitious, or fraudulent statements or representations as to any matter within its jurisdiction.

(Continued on page 2)

QUALIFICATIONS

For all leases that may be issued: The bidder/lessee shall comply with the Departments of the Interior's nonprocurement debarment and suspension regulations as required by 2 CFR 1400 subpart B and shall communicate the requirement to comply with these regulations to persons with whom it does business related to this lease by including this term in its contracts and transactions.

For leases that may be issued as a result of this sale under the Mineral Leasing Act (The Act) of 1920, as amended, the bidder must: (1) Be a citizen of the United States; an association (*including partnerships and trusts*) of such citizens; a municipality; or a corporation organized under the laws of the United States or of any State or Territory thereof; (2) Be in compliance with the acreage limitation requirements wherein the bidder's interests, direct and indirect, in oil and gas leases in the State identified do not exceed 246,080 acres each in public domain or acquired lands including acreage covered by this bid, of which not more than 200,000 acres are under options. If this bid is submitted for lands in Alaska, the bidder's holdings in each of the Alaska leasing districts do not exceed 300,000 acres, of which no more than 200,000 acres are under options in each district; (3) Be in compliance with Federal coal lease holdings as provided in sec. 2(a)(2)(A) of the Act (Title 30 U.S.C. Section 201(a)(2)(A)); (4) Be in compliance with reclamation requirements for all Federal oil and gas holdings as required by sec. 17 of the Act (Title 30 U.S.C. Section 226(g)); (5) Not be in violation of sec. 41 of the Act (Title 30 U.S.C. Section 195)); and (6) Certify that all parties in this bid are in compliance with 43 CFR parts 3000 and 3100 and the leasing authority cited herein.

For leases that may be issued as a result of this sale under the Geothermal Steam Act of 1970, as amended, the bidder must: (1) Be a citizen of the United States who is at least 18 years of age; an association of such citizens; a municipality; a corporation organized under the laws of the United States or of any State or Territory thereof; or a domestic governmental unit; and (2) Be in compliance with the acreage limitation requirements wherein the bidder's interests, direct and indirect, do not exceed 51,200 acres, and (3) Certify that all parties in this bid are in compliance with 43 CFR part 3200 and the leasing authority cited herein.

For leases that may be issued as a result of this sale under the Department of the Interior Appropriations Act of 1981, the bidder must: (1) Be a citizen or national of the United States; an alien lawfully admitted for permanent residence; a private, public or municipal corporation organized under the laws of the United States or of any State or Territory thereof; an association of such citizens, nationals, resident aliens or private, public or municipal corporations; and (2) Certify that all parties in interest in this bid are in compliance with 43 CFR part 3130 and the leasing authority cited herein.

NOTICES

This form is exempt from the Paperwork Reduction Act of 1995 (P.L. 104-13) under 5 CFR 1320.3(h)(1).

The Privacy Act of 1974 and the regulations in 43 CFR 2.48(d) provide that you be furnished with the following information in connection with information required by this bid for a competitive oil and gas or geothermal resource lease.

AUTHORITY: 30 U.S.C. 181 et seq.; 30 U.S.C 351-359; 30 U.S.C. 1001-1025; 42 U.S.C. 6508.

PRINCIPAL PURPOSE: The information is to be used to process your bid.

ROUTINE USES: (1) The adjudication of the bidder's rights to resources for which this bid is made. (2) Documentation for public information. (3) Transfer to appropriate Federal agencies when consent or concurrence is required prior to granting a right in public lands or resources. (4)(5) Information from the record and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal or regulatory investigations or prosecutions.

EFFECT OF NOT PROVIDING INFORMATION: Disclosure of the information is voluntary. If all the information is not provided, your bid may be rejected.

Stipulations

Controlled Surface Use

DL-3578 Br-SS-E-CSU Soil Slopes 25% to 40%

Stipulation: Controlled Surface Use (CSU) applies to lands with slopes 25 percent or greater, up to 40 percent. An engineering/reclamation plan must be submitted by the applicant and approved by the BLM Authorized Officer before any surface disturbance can occur.

The plan must demonstrate to the Authorized Officer's satisfaction how the operator will meet the following performance standards:

- Soil stability is maintained preventing slope failure and wind or water erosion.
- The site will be stable with no evidence of accelerated erosion features.
- The rate of soil erosion will be controlled to maintain or improve soil quality and sustainability.
- Sufficient topsoil is maintained for ensuring successful interim and final reclamation.
- The original landform and site productivity will be partially restored during interim reclamation and fully restored as a result of final reclamation.

Objective [Purpose]: To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems, and to ensure successful interim and final reclamation.

Exception: An exception may be granted if the operator can demonstrate in a plan of operations that adverse effects can be minimized and activities safely conducted.

Modification: The area affected by this stipulation may be modified by the Authorized Officer if it is determined that portions of the area do not include slopes between 25 and 40 percent, or the operator can demonstrate in a plan of operations that adverse effects can be minimized. The Authorized Officer may modify the size and shape of the restricted area subject to the stipulation based upon a Natural Resource Conservation Service (NRCS) soil survey or BLM evaluation. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes between 25 and 40 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3582 ID-19-B-CSU Visual Resource Management Class II

Stipulation: Controlled Surface Use (CSU) will be applied to areas managed as Visual Resource Management (VRM) Class II under the applicable land use plan. Prior to surface disturbance, a site-specific plan must be submitted to the BLM by the applicant that demonstrates how the proposed activities will be designed and located to blend into the natural landscape and not be

visually apparent to the casual visitor. The operator may not initiate surface-disturbing activities unless the Authorized Officer has approved the plan or approved it with conditions.

Objective [Purpose]: To protect visual resources in VRM Class II areas.

Exception: The Authorized Officer may grant an exception if it is demonstrated that the project or identified mitigation will meet or exceed VRM Class II objectives. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

Modification: The Authorized Officer may modify the area subject to the stipulation if it is demonstrated that VRM Class II objectives have been modified through appropriate RMP planning procedures or if a portion of parcel is not located within a VRM Class II area. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

Waiver: The Authorized Officer may grant a waiver if it is determined that the entire leasehold is no longer managed for VRM Class II objectives based on planning or if it is determined that the described lands are not located in a Class II area. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

DL-3583 ID-10-C-CSU Sage-Grouse Habitat, GHMA Leks

Stipulation: Controlled Surface Use (CSU) - Surface disturbance in GHMA should be avoided within 3.1 miles of active or pending active Greater Sage-Grouse leks in any HMA by locating actions outside of the identified buffer.

If it is not possible to relocate the project outside of the 3.1-mile lek buffer, the BLM may approve the project only if:

-the BLM determines that a reduced lek buffer-distance offers the same or a greater level of protection to GRSG and its habitat, including conservation of seasonal habitat outside of the analyzed buffer area, based on best available science, landscape features, and other existing protections, (e.g., land use allocations, state regulations); or -the BLM determines that impacts to GRSG and its habitat are minimized such that the project will cause minor or no new disturbance (ex. co-location with existing authorizations).

In addition, any residual impacts within the lek buffer-distance are addressed through compensatory mitigation measures sufficient to ensure a net conservation gain, as outlined in the Mitigation Strategy.

Objective: To protect Greater Sage-grouse leks in GHMA.

Exception: The Authorized Officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, would not impair the function or utility of the site for the current or subsequent seasonal habitat, life-history, or behavioral needs of GRSG due to site-specific terrain and habitat features, such as topographic features that would reduce the habitat impacts by shielding nearby habitat from disruptive factors.

An exception could also be granted if it can be demonstrated by a wildlife biologist and confirmed by the BLM, based on site-specific information (using State mitigation tools such as Habitat Equivalency Analysis or Habitat Quantification Tool, or other State mitigation programs), that the impacts anticipated by the proposed activity would be offset through

voluntary compensatory mitigation developed in coordination with the appropriate State agency that meets principles of GRSg mitigation identified in the RMP.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal modification is justified on the basis that it serves to better protect or enhance GRSg and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

- A proposed authorization is expected to have beneficial or neutral impacts on GRSg and its habitat.

- Topography or other factors eliminate direct and indirect visible and audible impacts to GRSg and its habitat.

- There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area that was mapped as a GRSg habitat management area (regardless of type) when the lease was issued is no longer mapped as such through the appropriate planning process.

DL-3589 ID-17-C-CSU Soil Slopes 30% to 40%

Stipulation: Controlled Surface Use (CSU) on slopes greater than 30 percent, up to 40 percent.

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the slope would not result in mass slope failure or accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes greater than 30 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3592 Ow-11-A-CSU Sensitive Species Plants

Stipulation: Controlled Surface Use (CSU) within high value, BLM Sensitive Species plant habitat as mapped on the Owyhee GIS database, or determined by BLM from field evaluation, in coordination with the USFWS for the purpose of protecting special status plant. Five BLM Sensitive Plant Species (Packard's buckwheat, Shockley's buckwheat, Janish's buckwheat, white-margined wax plant, and desert pincushion) occur within nominated parcels. Prior to surface disturbance within special status plant habitat, surveys must be conducted, and a plan must be submitted to the BLM by the applicant as a component of the APD or Sundry Notice, etc. The operator shall not initiate surface- disturbing activities unless the BLM Authorized Officer has approved the Plan (with conditions as appropriate). The plan must demonstrate to the Authorized Officer's satisfaction the special status plants will not be harmed.

Objective [Purpose]: To protect high value sensitive species habitat for Packard's buckwheat, Shockley's buckwheat, Janish's buckwheat, white-margined wax plant, and desert pincushion where other existing measures are inadequate to meet agency management objectives.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect habitat for Packard's buckwheat, Shockley's buckwheat, Janish's buckwheat, white-margined wax plant, and desert pincushion protected by this restriction. An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation, in coordination with the IDFG. The stipulation may be modified based on monitoring results.

Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area does not contain Packard's buckwheat, Shockley's buckwheat, Janish's buckwheat, white-margined wax plant, or desert pincushion. This determination shall be based upon a BLM evaluation, in coordination with the IDFG.

DL-3610 ID-10-C-CSU Sage-Grouse Habitat, GHMA Leks

Stipulation: Controlled Surface Use (CSU) - Surface disturbance in GHMA should be avoided within 3.1 miles of active or pending active Greater Sage-Grouse leks in any HMA by locating actions outside of the identified buffer.

If it is not possible to relocate the project outside of the 3.1-mile lek buffer, the BLM may approve the project only if:

- the BLM determines that a reduced lek buffer-distance offers the same or a greater level of protection to GRS and its habitat, including conservation of seasonal habitat outside of the analyzed buffer area, based on best available science, landscape features, and other existing

protections, (e.g., land use allocations, state regulations); or -the BLM determines that impacts to GRSB and its habitat are minimized such that the project will cause minor or no new disturbance (ex. co-location with existing authorizations).

In addition, any residual impacts within the lek buffer-distance are addressed through compensatory mitigation measures sufficient to ensure a net conservation gain, as outlined in the Mitigation Strategy.

Objective: To protect Greater Sage-grouse leks in GHMA.

Exception: The Authorized Officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, would not impair the function or utility of the site for the current or subsequent seasonal habitat, life-history, or behavioral needs of GRSB due to site-specific terrain and habitat features, such as topographic features that would reduce the habitat impacts by shielding nearby habitat from disruptive factors.

An exception could also be granted if it can be demonstrated by a wildlife biologist and confirmed by the BLM, based on site-specific information (using State mitigation tools such as Habitat Equivalency Analysis or Habitat Quantification Tool, or other State mitigation programs), that the impacts anticipated by the proposed activity would be offset through voluntary compensatory mitigation developed in coordination with the appropriate State agency that meets principles of GRSB mitigation identified in the RMP.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal modification is justified on the basis that it serves to better protect or enhance GRSB and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

- A proposed authorization is expected to have beneficial or neutral impacts on GRSB and its habitat.

- Topography or other factors eliminate direct and indirect visible and audible impacts to GRSB and its habitat.

- There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area that was mapped as a GRSB habitat management area (regardless of type) when the lease was issued is no longer mapped as such through the appropriate planning process.

DL-3612 ID-17-C-CSU Soil Slopes 30% to 40%

Stipulation: Controlled Surface Use (CSU) on slopes greater than 30 percent, up to 40 percent.

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the slope would not result in mass slope failure or accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes greater than 30 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3615 ID-19-B-CSU Visual Resource Management Class II

Stipulation: Controlled Surface Use (CSU) will be applied to areas managed as Visual Resource Management (VRM) Class II under the applicable land use plan. Prior to surface disturbance, a site-specific plan must be submitted to the BLM by the applicant that demonstrates how the proposed activities will be designed and located to blend into the natural landscape and not be visually apparent to the casual visitor. The operator may not initiate surface-disturbing activities unless the Authorized Officer has approved the plan or approved it with conditions.

Objective [Purpose]: To protect visual resources in VRM Class II areas.

Exception: The Authorized Officer may grant an exception if it is demonstrated that the project or identified mitigation will meet or exceed VRM Class II objectives. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

Modification: The Authorized Officer may modify the area subject to the stipulation if it is demonstrated that VRM Class II objectives have been modified through appropriate RMP planning procedures or if a portion of parcel is not located within a VRM Class II area. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

Waiver: The Authorized Officer may grant a waiver if it is determined that the entire leasehold is no longer managed for VRM Class II objectives based on planning or if it is determined that the described lands are not located in a Class II area. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

DL-3616 ID-10-C-CSU Sage-Grouse Habitat, GHMA Leaks

Stipulation: Controlled Surface Use (CSU) - Surface disturbance in GHMA should be avoided within 3.1 miles of active or pending active Greater Sage-Grouse leks in any HMA by locating actions outside of the identified buffer.

If it is not possible to relocate the project outside of the 3.1-mile lek buffer, the BLM may approve the project only if:

-the BLM determines that a reduced lek buffer-distance offers the same or a greater level of protection to GRSg and its habitat, including conservation of seasonal habitat outside of the analyzed buffer area, based on best available science, landscape features, and other existing protections, (e.g., land use allocations, state regulations); or -the BLM determines that impacts to GRSg and its habitat are minimized such that the project will cause minor or no new disturbance (ex. co-location with existing authorizations).

In addition, any residual impacts within the lek buffer-distance are addressed through compensatory mitigation measures sufficient to ensure a net conservation gain, as outlined in the Mitigation Strategy.

Objective: To protect Greater Sage-grouse leks in GHMA.

Exception: The Authorized Officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, would not impair the function or utility of the site for the current or subsequent seasonal habitat, life-history, or behavioral needs of GRSg due to site-specific terrain and habitat features, such as topographic features that would reduce the habitat impacts by shielding nearby habitat from disruptive factors.

An exception could also be granted if it can be demonstrated by a wildlife biologist and confirmed by the BLM, based on site-specific information (using State mitigation tools such as Habitat Equivalency Analysis or Habitat Quantification Tool, or other State mitigation programs), that the impacts anticipated by the proposed activity would be offset through voluntary compensatory mitigation developed in coordination with the appropriate State agency that meets principles of GRSg mitigation identified in the RMP.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal modification is justified on the basis that it serves to better protect or enhance GRSg and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

-A proposed authorization is expected to have beneficial or neutral impacts on GRSg and its habitat.

-Topography or other factors eliminate direct and indirect visible and audible impacts to GRSg and its habitat.

-There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area that was mapped as a GRSG habitat management area (regardless of type) when the lease was issued is no longer mapped as such through the appropriate planning process.

DL-3620 Br-10-A-CSU Riparian Habitat Buffer CSU

Stipulation: Controlled Surface Use (CSU) will be applied within 500 feet of riparian-wetland vegetation to protect the values and functions of these areas. An engineering plan or a study may be required by the operator that identifies the extent of the resource or how the resource will be managed or protected.

Objective [Purpose]: To protect the values and functions of riparian and wetland areas based on the nature, extent, and value of the area potentially affected Exception: The Authorized Officer may grant an exception:

-If an environmental review determines that the action, as proposed or otherwise restricted, does not affect the resource; or -If the proponent, BLM, and other affected interests (e.g., Idaho Department of Fish and Game) negotiate mitigation that would satisfactorily offset the anticipated negative impacts; or -For actions designed to enhance the long-term utility or availability of the riparian habitat.

Modification: The Authorized Officer may modify the size and shape of the restricted area if an environmental analysis indicates the actual suitability of the land for the resource differs from that in the otherwise applicable restriction.

Waiver: The restriction may be waived if it is determined that the described lands do not contain the subject resource or are incapable of serving the requirements of the resource and therefore no longer warrant consideration as a component necessary for protection of the resource.

DL-3624 Fo-22-A-CSU Air Quality

Stipulation: All drilling and production operations are required to adhere to the following minimum standards:

1. Drill rig engines must meet Environmental Protection Agency (EPA) Tier II or better standards, as necessary based on air quality conditions or projections, and consistent with the most stringent EPA emissions standards that are in force at the time of installation or approval.
2. Stationary internal combustion engine standard of 2g NOx/bhp-hr for engines 300 HP.
3. Low bleed or no bleed pneumatic controller.
4. Dehydrator VOC emission controls to +95 percent efficiency.
5. Tank VOC emission controls to +95 percent efficiency equivalent to New Source Performance Standards (NSPS) subpart 0000.

Exception: None Modification: The Authorized Officer may modify the stipulation as a result of new information if: 1) the protection provided by the stipulation is no longer justified or necessary to meet resource objectives established in the Four Rivers RMP; 2) the protection provided by the stipulation is no longer sufficient to meet resource objectives established in the Four Rivers RMP; or 3) proposed operations will not cause unacceptable impacts. The Authorized Officer may require additional plans of development, surveys, mitigation proposals, or environmental analysis, and may be required to consult with other government agencies and/or the public in order to make this determination. The modification may be subject to public review for at least a 30-day period.

Waiver: None

DL-3625 Fo-22-B-CSU Fugitive Dust Control

Stipulation: A Fugitive Dust Control Plan is required for mineral activities that will disturb a surface area larger than 0.25 acres or that will involve truck traffic on unpaved or untreated surfaces.

Exception: None Modification: The Authorized Officer may modify the stipulation as a result of new information if: 1) the protection provided by the stipulation is no longer justified or necessary to meet resource objectives established in the Four Rivers RMP; 2) the protection provided by the stipulation is no longer sufficient to meet resource objectives established in the Four Rivers RMP; or 3) proposed operations will not cause unacceptable impacts. The Authorized Officer may require additional plans of development, surveys, mitigation proposals, or environmental analysis, and may be required to consult with other government agencies and/or the public in order to make this determination. The modification may be subject to public review for at least a 30-day period.

Waiver: None

DL-3628 Fo-14-B-CSU Oregon Trail Management Corridor

Stipulation: No Surface occupancy or use will be restricted or prohibited within two miles from the Oregon National Historic Trail (NHT) or the visual horizon whichever is closer where setting is an important aspect of the integrity for the trail unless the operator and surface managing agency arrive at an acceptable plan for mitigation of anticipated impacts. The Plan must demonstrate proposed infrastructure is either not visible or will result in a weak contrast rating.

Exception: The Authorized Officer may consider a lease stipulation exception within the Oregon Trail Management Corridor if 1) an action is at least two miles from the NHT, a significant NHT historical or recreational site, or NHT related recreational activities; or, 2) all components and effects of the action are in compliance with the RMP- designated VRM standard in consultation with appropriate federal agency. The proposal must be capable of attaining a no adverse-affect determination in consultation with SHPO.

Modification: The Authorized Officer may modify the area subject to the stipulation or surface occupancy criteria if it is determined by the BLM, after consultation with the appropriate federal

and/or agency that a portion of the NSO area does not contribute, as determined by Section 106, to the trails' nature and purpose or their setting or if the proposed action can be developed in a way that meets the management objectives for the NHT. This determination shall be based upon field evaluation of the area by a qualified archaeologist/historian and subject to confirmation by the BLM.

Waiver: The Authorized Officer may grant a waiver if it is determined, in consultation with the appropriate federal and/or state agency, that the area is no longer considered to contribute to the trails' nature and purpose or setting or if the proposed action can be developed in a way that meets the management objectives for the NHT. This determination shall be based upon field evaluation of the area by a qualified archaeologist/historian and subject to confirmation by the BLM.

DL-3629 Fo-17-A-CSU Soil Slopes >40%

Stipulation: Surface disturbance is restricted on slopes greater than 40 percent.

Objective [Purpose]: Surface disturbance is restricted on slopes greater than 40 percent. Prior to surface disturbance on slopes greater than 40 percent a site-specific construction, stabilization, and reclamation plan (Plan) must be submitted to the BLM by the applicant as a component of the APD (BLM Form 3160-3) or Sundry Notice (BLM Form 3160-5) – Surface Use Plan of Operations. The Plan must include designs approved and stamped by a licensed engineer. The operator shall not initiate surface-disturbing activities unless the BLM Authorized Officer has approved the Plan (with conditions, as appropriate). The Plan must demonstrate to the BLM Authorized Officer's satisfaction how the operator will meet the following performance standards:

- Slope stability is maintained preventing slope failure or mass wasting.
- The disturbed area will be stabilized with no evidence of accelerated erosion features.
- The disturbed area shall be managed to ensure soil characteristics approximate an appropriate reference site with regard to erosional features to maintain soil productivity and sustainability.
- Sufficient viable topsoil is maintained for ensuring successful final reclamation. At locations where interim reclamation will be completed, this will be accomplished by re-spreading all salvaged topsoil over the areas of interim reclamation.
- The original landform and site productivity will be partially restored during interim reclamation and fully restored as a result of final reclamation.

On lands as mapped by the U.S. Geological Survey (USGS) 1:24,000 scale topographic maps, USGS Digital Elevation Models, and/or as determined by a BLM evaluation of the area, for the purpose of ensuring successful reclamation and erosion control on slopes greater than 40 percent in order to meet the standards outlined in Chapter 6 of the BLM's Oil and Gas Gold Book, as revised.

Exception: The BLM Authorized Officer may grant an exception if it is determined that the action will not result in a failure to meet the performance standards above, or a BLM evaluation determines that the disturbed area is not located on slopes greater than 40 percent.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may be modified based on monitoring results.

Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area does not include slopes greater than 40 percent. This determination shall be based upon USGS mapping and/or BLM evaluation of the area.

DL-3630 Fo-17-B-CSU Soils with Limited Reclamation Potential

Stipulation: Surface disturbance is prohibited or restricted on limited reclamation potential areas such as areas possessing sensitive geologic formations, extremely limiting soil conditions, biological soil crusts, badlands, rock outcrops, and slopes susceptible to mass failure. CSU (1): (a) Prior to surface disturbance on limited reclamation potential areas a site-specific construction, stabilization, and reclamation plan (Plan) must be submitted to the BLM by the applicant as a component of the APD or Sundry Notice, etc.

The Plan must include designs approved and stamped by a licensed engineer. The operator shall not initiate surface-disturbing activities unless the BLM Authorized Officer has approved the Plan (with conditions, as appropriate). The Plan must demonstrate to the BLM Authorized Officer's satisfaction how the operator will meet the following performance standards:

- The disturbed area will be stabilized with no evidence of accelerated erosion features.
- The disturbed area shall be managed to ensure soil characteristics approximate an appropriate reference site with regard to erosional features to maintain soil productivity and sustainability.
- Slope stability is maintained preventing slope failure and erosion.
- Sufficient viable topsoil is maintained for ensuring successful final reclamation. At locations where interim reclamation will be completed, this will be accomplished by re-spreading all salvaged topsoil over the areas of interim reclamation.
- The original landform and site productivity will be partially restored during interim reclamation and fully restored as a result of final reclamation.

On lands as mapped by the NRCS SSURGO Order 3 soil survey or as determined by a BLM evaluation of the area. For the purpose of ensuring successful reclamation and erosion control on limited reclamation potential areas in order to meet the standards outlined in Chapter 6 of the BLM's Oil and Gas Gold Book, as revised.

Exception: The BLM Authorized Officer may grant an exception if it is determined that the action will not result in a failure to meet the performance standards above or a BLM evaluation determines that the area does not meet the limited reclamation criteria.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based upon a NRCS soil survey and BLM evaluation. The stipulation and performance standards identified above may be modified based on monitoring results.

Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area does not include limited reclamation potential areas. This determination shall be based upon NRCS mapping and BLM evaluation.

DL-3635 Fo-11-B-CSU Sensitive Species (Plants)

Stipulation: Controlled Surface Use (CSU) within high value, BLM Sensitive Species plant habitat as mapped on the FRFO GIS database, or determined by BLM from field evaluation, in coordination with the USFWS for the purpose of protecting special status plant. Two BLM Sensitive Species, Fairfield milkvetch (*Astragalus atratus* var. *inseptus*) occurs within nominated parcels. Prior to surface disturbance within special status plant habitat, surveys must be conducted, and a plan must be submitted to the BLM by the applicant as a component of the APD or Sundry Notice, etc. The operator shall not initiate surface- disturbing activities unless the BLM Authorized Officer has approved the Plan (with conditions as appropriate). The plan must demonstrate to the Authorized Officer's satisfaction the special status plants will not be harmed.

Objective [Purpose]: To protect high value Special Status Plants (Fairfield milkvetch) where other existing measures are inadequate to meet agency management objectives.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect Special Status Plants (Fairfield milkvetch). An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation, in coordination with the IDFG. The stipulation may be modified based on monitoring results.

Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area does not contain Special Status Plants (Fairfield milkvetch). This determination shall be based upon a BLM evaluation, in coordination with the IDFG.

DL-3645 Fo-16-A-CSU Protect Ground Water Resource

Stipulation: Surface occupancy or use is subject to the following special operating constraints. Fluid mineral operations using multi-stage hydraulic fracturing shall use the following measures to protect potentially usable water bearing intervals:

- In all directions a minimum of 2,500 feet of buffer distance (or greater if deemed necessary by BLM) between the well bore (production string) and the lower extent of shallow (
- Operators are required to acquire all appropriate federal, state, and/or local licenses and/or permits.

Exception: None Modification: The Authorized Officer may modify the stipulation as a result of new information if: 1) the protection provided by the stipulation is no longer justified or necessary to meet resource objectives established in the Four Rivers RMP; 2) the protection provided by the stipulation is no longer sufficient to meet resource objectives established in the Four Rivers RMP; or 3) proposed operations will not cause unacceptable impacts. The Authorized Officer may require additional plans of development, surveys, mitigation proposals, or environmental analysis, and may be required to consult with other government agencies

and/or the public in order to make this determination. The modification may be subject to public review for at least a 30-day period.

Waiver: None

DL-3647 Sa-18-B-CSU Geothermal Features Monitoring

Stipulation: Controlled Surface Use (CSU) will be applied to Sharkey Hot Springs and its contributing features. The operator may be required to monitor geothermal features during any exploration, development, or production of the lease to ensure there are no impacts to geothermal resource features.

Objective [Purpose]: To protect the integrity of geothermal resource features, such as springs and geysers to prevent adverse effects to such features.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not affect the resource. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that will satisfactorily offset the anticipated negative impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the Sharkey Hot Springs resource and its contributing features.

Modification: The Authorized Officer may modify the size and shape of the restricted area if it is determined that the action, as proposed or otherwise restricted, does not adversely affect the geothermal resource and its unique values.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain springs, geysers, or other geothermal resource features or if the described lands within the boundaries are determined to not be necessary to protect the geothermal features.

DL-3651 ID-17-C-CSU Soil Slopes 30% to 40%

Stipulation: Controlled Surface Use (CSU) on slopes greater than 30 percent, up to 40 percent.

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the slope would not result in mass slope failure or accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes greater than 30 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3654 ID-16-C-CSU Riparian Habitat Buffer

Stipulation: Controlled Surface Use (CSU) will be applied within 500 feet of riparian-wetland vegetation to protect the values and functions of these areas. An engineering plan or a study may be required by the operator that identifies the extent of the resource or how the resource will be managed or protected.

Objective [Purpose]: To protect the values and functions of riparian and wetland areas based on the nature, extent, and value of the area potentially affected Exception: The Authorized Officer may grant an exception:

-If an environmental review determines that the action, as proposed or otherwise restricted, does not affect the resource; or -If the proponent, BLM, and other affected interests (e.g., Idaho Department of Fish and Game) negotiate mitigation that would satisfactorily offset the anticipated negative impacts; or -For actions designed to enhance the long-term utility or availability of the riparian habitat.

Modification: The Authorized Officer may modify the size and shape of the restricted area if an environmental analysis indicates the actual suitability of the land for the resource differs from that in the otherwise applicable restriction.

Waiver: The restriction may be waived if it is determined that the described lands do not contain the subject resource, or are incapable of serving the requirements of the resource and therefore no longer warrant consideration as a component necessary for protection of the resource.

DL-3655 ID-19-B-CSU Visual Resource Management Class II

Stipulation: Controlled Surface Use (CSU) will be applied to areas managed as Visual Resource Management (VRM) Class II under the applicable land use plan. Prior to surface disturbance, a site-specific plan must be submitted to the BLM by the applicant that demonstrates how the proposed activities will be designed and located to blend into the natural landscape and not be visually apparent to the casual visitor. The operator may not initiate surface-disturbing activities unless the Authorized Officer has approved the plan or approved it with conditions.

Objective [Purpose]: To protect visual resources in VRM Class II areas.

Exception: The Authorized Officer may grant an exception if it is demonstrated that the project or identified mitigation will meet or exceed VRM Class II objectives. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

Modification: The Authorized Officer may modify the area subject to the stipulation if it is demonstrated that VRM Class II objectives have been modified through appropriate RMP planning procedures or if a portion of parcel is not located within a VRM Class II area. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

Waiver: The Authorized Officer may grant a waiver if it is determined that the entire leasehold is no longer managed for VRM Class II objectives based on planning or if it is determined that the

described lands are not located in a Class II area. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

DL-3663 ID-17-C-CSU Soil Slopes >30% to 40%

Stipulation: Controlled Surface Use (CSU) on slopes greater than 30 percent, up to 40 percent.

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the slope would not result in mass slope failure or accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes greater than 30 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3665 ID-16-C-CSU Riparian Habitat

Stipulation: Controlled Surface Use (CSU) will be applied within 500 feet of riparian-wetland vegetation to protect the values and functions of these areas. An engineering plan or a study may be required by the operator that identifies the extent of the resource or how the resource will be managed or protected.

Objective [Purpose]: To protect the values and functions of riparian and wetland areas based on the nature, extent, and value of the area potentially affected.

Exception: The Authorized Officer may grant an exception:

-If an environmental review determines that the action, as proposed or otherwise restricted, does not affect the resource; or -If the proponent, BLM, and other affected interests (e.g., Idaho Department of Fish and Game) negotiate mitigation that would satisfactorily offset the anticipated negative impacts; or -For actions designed to enhance the long-term utility or availability of the riparian habitat.

Modification: The Authorized Officer may modify the size and shape of the restricted area if an environmental analysis indicates the actual suitability of the land for the resource differs from that in the otherwise applicable restriction.

Waiver: The restriction may be waived if it is determined that the described lands do not contain the subject resource or are incapable of serving the requirements of the resource and therefore no longer warrant consideration as a component necessary for protection of the resource.

DL-3666 ID-19-B-CSU Visual Resource Management Class II

Stipulation: Controlled Surface Use (CSU) will be applied to areas managed as Visual Resource Management (VRM) Class II under the applicable land use plan. Prior to surface disturbance, a site-specific plan must be submitted to the BLM by the applicant that demonstrates how the proposed activities will be designed and located to blend into the natural landscape and not be visually apparent to the casual visitor. The operator may not initiate surface-disturbing activities unless the Authorized Officer has approved the plan or approved it with conditions.

Objective [Purpose]: To protect visual resources in VRM Class II areas.

Exception: The Authorized Officer may grant an exception if it is demonstrated that the project or identified mitigation will meet or exceed VRM Class II objectives. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

Modification: The Authorized Officer may modify the area subject to the stipulation if it is demonstrated that VRM Class II objectives have been modified through appropriate RMP planning procedures or if a portion of parcel is not located within a VRM Class II area. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

Waiver: The Authorized Officer may grant a waiver if it is determined that the entire leasehold is no longer managed for VRM Class II objectives based on planning or if it is determined that the described lands are not located in a Class II area. Any changes to this stipulation will be made in accordance with the land use plan, the regulatory provisions for such changes, or both.

DL-3668 ID-10-C-CSU Sage-Grouse Habitat, GHMA Leks

Stipulation: Controlled Surface Use (CSU) - Surface disturbance in GHMA should be avoided within 3.1 miles of active or pending active Greater Sage-Grouse leks in any HMA by locating actions outside of the identified buffer.

If it is not possible to relocate the project outside of the 3.1-mile lek buffer, the BLM may approve the project only if:

-the BLM determines that a reduced lek buffer-distance offers the same or a greater level of protection to GRSG and its habitat, including conservation of seasonal habitat outside of the analyzed buffer area, based on best available science, landscape features, and other existing protections, (e.g., land use allocations, state regulations); or -the BLM determines that impacts to GRSG and its habitat are minimized such that the project will cause minor or no new disturbance (ex. co-location with existing authorizations).

In addition, any residual impacts within the lek buffer-distance are addressed through compensatory mitigation measures sufficient to ensure a net conservation gain, as outlined in the Mitigation Strategy.

Objective: To protect Greater Sage-grouse leks in GHMA.

Exception: The Authorized Officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, would not impair the function or utility of the site for the current or subsequent seasonal habitat, life-history, or behavioral needs of GRSG due to site-specific terrain and habitat features, such as topographic features that would reduce the habitat impacts by shielding nearby habitat from disruptive factors.

An exception could also be granted if it can be demonstrated by a wildlife biologist and confirmed by the BLM, based on site-specific information (using State mitigation tools such as Habitat Equivalency Analysis or Habitat Quantification Tool, or other State mitigation programs), that the impacts anticipated by the proposed activity would be offset through voluntary compensatory mitigation developed in coordination with the appropriate State agency that meets principles of GRSG mitigation identified in the RMP.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal modification is justified on the basis that it serves to better protect or enhance GRSG and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

- A proposed authorization is expected to have beneficial or neutral impacts on GRSG and its habitat.

- Topography or other factors eliminate direct and indirect visible and audible impacts to GRSG and its habitat.

- There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area that was mapped as a GRSG habitat management area (regardless of type) when the lease was issued is no longer mapped as such through the appropriate planning process.

Lease Notice

DL-2238 ID-MHAFB-00-A-LN Mountain Home Air Force Base

The parcels nominated for leasing may include in whole or in part areas that are, or may be, utilized for activities related to military readiness, including controlled or uncontrolled airspace classifications associated with the Mountain Home Air Force Base. The lessee/operator is responsible for coordinating with the appropriate representatives of the Department of Defense (DoD) to ensure geothermal development activities will not cause an unacceptable risk to

military readiness or national security. The operator/lessee must also abide by all rules and regulations for airspace classifications as determined by the Federal Aviation Administration (FAA).

Objective: Inform potential lease bidder that the parcels are near the Mountain Home Air Force Base.

Exception: None.

Modification: None.

Waiver: None

DL-3566 HQ-TES-1 Threatened and Endangered Species Act

The lease area may now or hereafter contain plants, animals, or their habitats determined to be threatened, endangered, or other special status species. The BLM may recommend modifications to exploration and development proposals to further its conservation and management objective to avoid BLM-approved activity that would contribute to a need to list such a species or their habitat. The BLM may require modifications to or disapprove proposed activity that is likely to result in jeopardy to the continued existence of a proposed or listed threatened or endangered species or result in the destruction or adverse modification of a designated or proposed critical habitat. The BLM will not approve any ground-disturbing activity until it completes its obligations under applicable requirements of the Endangered Species Act as amended, 16 U.S.C. § 1531 et seq. including completion of any required procedure for conference or consultation.

DL-3567 HQ-CR-1 Cultural Resource Protection

This lease may be found to contain historic properties and/or resources protected under National Historic Preservation Act (NHPA), American Indian Religious Freedom Act, Native American Graves Protection and Repatriation Act, E.O. 13007, or other statutes and executive orders. The BLM will not approve any ground-disturbing activities that may affect any such properties or resources until it completes its obligations under applicable requirements of the NHPA and other authorities. The BLM may require modification to exploration or development proposals to protect such properties, or disapprove any activity that is likely to result in adverse effects that cannot be successfully avoided, minimized, or mitigated.

DL-3568 HQ-MLA-1 Notice to Lessee Concerning Mineral Leasing Act Section 2(a)(2)(A)

Provisions of the Mineral Leasing Act (MLA) of 1920, as amended by the Federal Coal Leasing Amendments Act of 1976, affect an entity's qualifications to obtain an oil and gas lease. Section 2(a)(2)(A) of the MLA, 30 U.S.C. 201(a)(2)(A), requires that any entity that holds and has held a Federal Coal Lease for 10 years beginning on or after August 4, 1976, and that is not producing coal in commercial quantities from each such lease cannot qualify for the issuance of any other

lease granted under the MLA. 43 CFR 3472 explains coal lessee compliance with Section 2(a)(2)(A).

In accordance with the terms of this oil and gas lease with respect to compliance by the initial lessee with qualifications concerning Federal coal lease holdings, all assignees and transferees are hereby notified that this oil and gas lease is subject to cancellation if: (1) the initial lessee as assignor or as transferor has falsely certified compliance with Section 2(a)(2)(A) because of a denial or disapproval by a State Office of a pending coal action, i.e., arms-length assignment, relinquishment, or logical mining unit; (2) the initial lessee as assignor or as transferor is no longer in compliance with Section 2(a)(2)(A); or (3) the assignee or transferee does not qualify as a bona fide purchaser and, thus, has no rights to bona fide purchaser protection in the event of cancellation of this lease due to noncompliance with Section 2(a)(2)(A).

The lease case file, as well as in other Bureau of Land Management (BLM) records available through the State Office issuing this lease, contains information regarding assignor or transferor compliance with Section 2(a)(2)(A).

DL-3588 Ow-18-A-LN Mine with Approved Plan of Operations

The lessee accepts that the leased lands include mining Plans of Operations, approved under the Surface Management regulations at 43 CFR 3809, which authorize the operator to remove locatable minerals under the General Mining Laws. The lessee further agrees that its activities shall not interfere with such approved mining operations. For additional information regarding these approved Plans of Operations, the lessee shall contact the BLM Field Office with jurisdiction over the parcel.

DL-3595 BU-18-A-LN Existing Geothermal Infrastructure

The parcel contains one or more geothermal wells. The winning bidder accepts that prior to issuance of the lease for this parcel, the successful bidder must provide adequate bond coverage in accordance with 43 CFR 3214. For more information regarding these wells, please contact the BLM Field Office in which the parcel resides.

DL-3597 BU-16-A-LN Flood Control Rights-of-Way

The nominated parcels contain land use authorization IDI 32119 for flood control water infiltration facilities. The lessee accepts this lease subject to valid existing rights, including the holder's right to access, operate, and maintain their authorized use. The lessee agrees that its operations will not interfere with uses.

DL-3623 ID-MHAFB-00-A-LN Mountain Home Air Force Base

The parcels nominated for leasing may include in whole or in part areas that are, or may be, utilized for activities related to military readiness, including controlled or uncontrolled airspace classifications associated with the Mountain Home Air Force Base. The lessee/operator is responsible for coordinating with the appropriate representatives of the Department of Defense (DoD) to ensure geothermal development activities will not cause an unacceptable risk to military readiness or national security. The operator/lessee must also abide by all rules and regulations for airspace classifications as determined by the Federal Aviation Administration (FAA).

DL-3626 ID-MM-21-B-LN Mineral Material Pits

The lessee accepts the lease is subject to the rights of individuals, authorized by the BLM, to remove mineral materials from the lands described below. The lessee agrees that its operations will not interfere with the use of the pit(s) by these individuals. For more information regarding these mineral material sites, please contact the BLM Field Office in which the parcel resides.

No Surface Occupancy

DL-3577 Br-12-A-NSO National Register of Historic Places

Stipulation: No Surface Occupancy (NSO) within the boundaries of 100E1455, which is a site consisting of a historic artifact scatter and multiple dugout features. It was determined eligible for the National Register of Historic Places by the BLM on January 19, 2018 with State Historic Preservation Office concurrence on February 3, 2018. The site was also identified in the Bruneau Management Framework Plan as requiring stabilization.

Objective: [Purpose]: To protect National Register-listed Properties and Districts, National Historic Landmarks, and Traditional Cultural Properties (TCPs) listed or eligible for the National Register of Historic Places (NRHP) and additional lands outside their designated boundaries to the extent necessary to protect values where the setting and visual integrity are critical to their eligibility.

Exception: The Authorized Officer may grant an exception if the BLM determines, in consultation with the Idaho State Historic Preservation Office (SHPO), that the action, as proposed or otherwise restricted, does not adversely affect National Register-listed Properties and Districts, National Historic Landmarks, and Traditional Cultural Properties listed or eligible for the NRHP. An exception may also be granted if BLM, in consultation with the Idaho SHPO, negotiate mitigation that would satisfactorily take into account any anticipated adverse effects. The Authorized Officer may also grant an exception if the BLM determines, in consultation with Tribes, interested parties, and the Idaho SHPO that the action, as proposed or otherwise restricted, does not adversely affect the site or sites.

Modification: The Authorized Officer may modify the size and shape of the restricted area if the BLM determines, in consultation with the Idaho SHPO, interested parties, and/or Tribes, that the Area of Potential Effect to the National Register-listed Properties and Districts, National Historic Landmarks, and TCPs listed or eligible on the NRHP may be modified without causing adverse effects from those described in the original stipulation.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain sites listed on the NRHP or TCPs listed or eligible for the NRHP, or if the described lands within extended boundaries are determined to be not necessary to protect listed sites or listed or eligible TCPs where the setting and visual integrity are critical to their eligibility.

DL-3579 ID-17-A-NSO Soil Slopes >40%

Stipulation: No Surface Occupancy (NSO) on slopes greater than 40 percent.

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the slope would not result in mass slope failure or accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes greater than 40 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3580 ID-17-B-NSO Soils High Erosion Potential

Stipulation: No Surface Occupancy (NSO) on lands with soils that have been categorized as "Moderately High" on the Inherent Erosion Hazard interpretation by the Natural Resources Conservation Service (NRCS).

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the soil would not result in accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may

also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with soils that have been categorized as “Moderately High” on the Inherent Erosion Hazard interpretation by the Natural Resources Conservation Service (NRCS).

DL-3581 ID-16-B-NSO Water Bodies, Riparian, Floodplain

Stipulation: No Surface Occupancy (NSO) on water bodies, riparian areas, wetlands, playas, and within 100-year flood risk areas.

Objective [Purpose]: To protect the values and hydrologic functions of water bodies, riparian and wetland areas, playas, and within 100-year flood risk areas.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not affect the resource. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that will satisfactorily offset the anticipated negative impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the water bodies, riparian habitat, wetlands, and/or 100-year floodplains.

Modification: The Authorized Officer may modify the size and shape of the restricted area if an environmental analysis indicates the actual suitability of the land for the resource differs from that in the otherwise applicable restriction.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain water bodies, riparian, wetlands, playas, or 100-year floodplains.

DL-3596 ID-12-B-NSO National Scenic and Historic Trails

Stipulation: No Surface Occupancy (NSO) will be applied directly on National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation and within National Trail Management Corridors. NSO may be applied to additional bordering lands; the extent will be dependent upon the topography and integrity of the setting surrounding individual trail segments along the designated National Historic Trail (NHT) and NHT Corridor. Prior to the establishment of a National Trail Management Corridor, at a minimum, NSO will be applied 1/4-mile on either side of the center line of the trail (for a total of a 1/2-mile wide corridor). The center line will be established either through the GIS-based line provided by the Trail Administering Agency (NPS or BLM) or through GPS-based inventories.

Objective [Purpose]: To protect the National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation, and National Trail Management Corridor that support the nature and purpose of the trail and the resources, qualities, values, associated settings (landscape elements - scenic, historic and cultural, recreation and natural) and primary use or uses of the trail.

Exception: The Authorized Officer may grant an exception if, through Section 106 consultation associated with the National Historic Preservation Act (NHPA) and Management of National

Scenic and Historic Trails and Trails Under Study or Recommended as Suitable for Congressional Designation Manual 6280 requirements for compliance with the National Trails System Act, it is determined that the action, as proposed or otherwise restricted, does not adversely affect the resource. An exception may be granted for actions designed to enhance the long-term utility or availability of the trail.

Modification: The Authorized Officer may modify the size and shape of the restricted area if through Section 106 consultation associated with the NHPA and Management of National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation Manual 6280 requirements for compliance with the National Trails System Act indicate the proposed action does not adversely impact the resource.

Waiver: The restriction may be waived if through Section 106 consultation associated with the NHPA and Management of National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation Manual 6280 requirements determine that the described lands are not contributing elements to the resource. This determination can only come after consultation with the National Park Service, Idaho State Historic Preservation Office (SHPO) and other interested publics.

DL-3598 BU-14-B-NSO Recreation Sites: Developed McCl

Stipulation: No Surface Occupancy (NSO) will be applied directly on Big Cottonwood Creek Trailhead, a site with significant recreational use.

Objective [Purpose]: To protect developed recreational facilities, special-use permit recreation sites (e.g., ski resorts and camps), and areas with significant recreational use which is incompatible with geothermal development.

Exception: The Authorized Officer may grant an exception if the BLM determines that the action, as proposed or otherwise restricted, does not adversely affect the site. An exception may also be granted if BLM negotiates mitigation that would satisfactorily take into account any anticipated adverse effects. The Authorized Officer may also grant an exception if the BLM determines the action does not adversely affect the site or sites.

Modification: The Authorized Officer may modify the size and shape of the restricted area if the BLM determines the area may be modified without causing adverse effects to the site or sites.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain developed recreation sites or if the described lands within the boundaries are determined to be not necessary to protect the site or sites.

DL-3599 BU-14-A-NSO Recreation Sites: Developed Cott

Stipulation: No Surface Occupancy (NSO) will be applied directly on Big Cottonwood Creek Trailhead, a site with significant recreational use.

Objective [Purpose]: To protect developed recreational facilities, special-use permit recreation sites (e.g., ski resorts and camps), and areas with significant recreational use which is incompatible with geothermal development.

Exception: The Authorized Officer may grant an exception if the BLM determines that the action, as proposed or otherwise restricted, does not adversely affect the site. An exception may also be granted if BLM negotiates mitigation that would satisfactorily take into account any anticipated adverse effects. The Authorized Officer may also grant an exception if the BLM determines the action does not adversely affect the site or sites.

Modification: The Authorized Officer may modify the size and shape of the restricted area if the BLM determines the area may be modified without causing adverse effects to the site or sites.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain developed recreation sites or if the described lands within the boundaries are determined to be not necessary to protect the site or sites.

DL-3600 ID-10-A-NSO Sage-Grouse Habitat, Priority

Stipulation: No Surface Occupancy (NSO) – Priority Habitat Management Areas (PHMA) will be open to mineral leasing and development and geophysical exploration subject to NSO to protect Greater Sage-grouse (GRSG) habitat in PHMA.

Objective: To protect Greater Sage-Grouse habitat in Priority Habitat Management Areas (PHMA) Exceptions:

Exception 1–

The Authorized Officer may consider and grant an exception to the NSO stipulation within 3.1 miles of active and pending active leks in PHMA if it is demonstrated that development and surface occupancy has no direct impacts to or disruption of GRSG or its habitat based on:

1. The location of the proposed authorization is determined to be non-habitat (refer to Glossary), does not provide important connectivity between habitat areas (as determined by a wildlife biologist and confirmed by the BLM using methods such as the HAF and coordinated with the appropriate state authority), and the project includes Required Design Features (RDF) to prevent indirect disturbance to or disruption of adjacent seasonal habitats, regardless of distance from the active or pending active lek, that may impair their biological function; OR 2. Topography/areas of non-habitat create an effective barrier to impacts (e.g., protected from visual and audible disturbances to GRSG and its habitat); OR 3. By co-locating the proposed authorization with existing disturbance, no additional impacts would be realized above those already associated with the existing similarly sized infrastructure, including indirect disturbance to or disruption of adjacent seasonal habitats that may impair their biological function.

Exception 1 would also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 2 –

The Authorized Officer may consider and grant an exception to the NSO stipulation associated with the remainder of PHMA beyond 3.1 miles from active or pending active leks if it would not result in adverse effects to GRSG seasonal habitats based on one of the following criteria:

1. The criteria presented in Exception #1. OR 2. The proposed project seeking the exception would not result in adverse effects to GRSG seasonal habitats based on site-specific information and application of the full range of mitigation tools (e.g., avoidance, minimization, voluntary compensation), as documented by a wildlife biologist and confirmed by the BLM. Proponents may demonstrate no adverse effects by mitigating residual impacts using voluntary compensatory mitigation. To grant this exception based on the use of voluntary compensatory mitigation, the compensation project must be completed and habitat functionality documented before the exception is granted. The compensation must also provide offsetting benefits to the population being impacted.

Exception 2 will also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 3–

An exception could be considered if the proposed location on public lands would be undertaken as an alternative to a similar action occurring on a nearby non-public lands parcel (e.g., due to ownership patterns), and development on the public parcel in question would eliminate impacts on more important and/or limited GRSG habitat (e.g., wet meadows, brood-rearing habitat) on the non-public nearby parcel; this exception must also include measures sufficient to allow the BLM to conclude in its documenting analysis that such benefits will endure for the duration of the proposed action's impacts on public lands (e.g., confirmation of an easement).

Exception 3 will also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Modification: The Authorized Officer may consider and grant a modification to the fluid mineral lease NSO stipulation, allowing for surface occupancy only where:

1. an exception is granted, as described above, for the primary disturbance (e.g., well pad, compressor station), AND 2. the potential associated infrastructure related to the development is

not individually precluded by other actions (e.g., roads, pipelines, power lines that could otherwise be considered through a ROW).

While the NSO stipulation could be modified for these additional developments, they must still comply with other GRSG management actions (e.g., mitigation, disturbance cap, minerals/energy density, seasonal restrictions, RDFs) if an exception to the NSO is granted.

Waiver: The Authorized Officer may consider and grant a waiver of the NSO stipulation on an existing lease after documenting, in coordination with the appropriate state agency, that the lease with the GRSG NSO stipulation is no longer in PHMA. This would only be applicable on leases that were issued when the parcel was in PHMA, then the PHMA boundaries were subsequently adjusted through the appropriate planning process.

DL-3601 ID-10-B-NSO Sage-Grouse Habitat, Important

Stipulation: No Surface Occupancy (NSO) - Important Habitat Management Areas (IHMA) will be open to mineral leasing and development and geophysical exploration subject to NSO to protect Greater Sage-grouse (GRSG) habitat in IHMA.

Objective: To protect Greater Sage-Grouse habitat in Important Habitat Management Areas (IHMA).

Exceptions:

Exception 1–

The Authorized Officer may consider and grant an exception to the NSO stipulation within 3.1 miles of active and pending active leks in IHMA and IHMA if it is demonstrated that development and surface occupancy has no direct impacts to or disruption of GRSG or its habitat based on:

1. The location of the proposed authorization is determined to be non-habitat (refer to Glossary), does not provide important connectivity between habitat areas (as determined by a wildlife biologist and confirmed by the BLM using methods such as the HAF and coordinated with the appropriate state authority), and the project includes RDFs to prevent indirect disturbance to or disruption of adjacent seasonal habitats, regardless of distance from the active or pending active lek, that may impair their biological function; OR 2. Topography/areas of non-habitat create an effective barrier to impacts (e.g., protected from visual and audible disturbances to GRSG and its habitat); OR 3. By co-locating the proposed authorization with existing disturbance, no additional impacts would be realized above those already associated with the existing similarly sized infrastructure, including indirect disturbance to or disruption of adjacent seasonal habitats that may impair their biological function.

Exception 1 would also be subject to Anthropogenic Disturbance Development Criteria (MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 2 –

The Authorized Officer may consider and grant an exception to the NSO stipulation associated with the remainder of IHMA beyond 3.1 miles from active or pending active leks if it would not result in adverse effects to GRSG seasonal habitats based on one of the following criteria:

1. The criteria presented in Exception #1. OR 2. The proposed project seeking the exception would not result in adverse effects to GRSG seasonal habitats based on site-specific information and application of the full range of mitigation tools (e.g., avoidance, minimization, voluntary compensation), as documented by a wildlife biologist and confirmed by the BLM. Proponents may demonstrate no adverse effects by mitigating residual impacts using voluntary compensatory mitigation. To grant this exception based on the use of voluntary compensatory mitigation, the compensation project must be completed and habitat functionality documented before the exception is granted. The compensation must also provide offsetting benefits to the population being impacted.

Exception 2 will also be subject to Anthropogenic Disturbance Development Criteria (MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as IHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 3–

An exception could be considered if the proposed location on public lands would be undertaken as an alternative to a similar action occurring on a nearby non-public lands parcel (e.g., due to ownership patterns), and development on the public parcel in question would eliminate impacts on more important and/or limited GRSG habitat (e.g., wet meadows, brood-rearing habitat) on the non-public nearby parcel; this exception must also include measures sufficient to allow the BLM to conclude in its documenting analysis that such benefits will endure for the duration of the proposed action's impacts on public lands (e.g., confirmation of an easement).

Exception 3 will also be subject to Anthropogenic Disturbance Development Criteria (MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as IHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Modification: The Authorized Officer may consider and grant a modification to the fluid mineral lease NSO stipulation, allowing for surface occupancy only where:

1. an exception is granted, as described above, for the primary disturbance (e.g., well pad, compressor station), AND 2. the potential associated infrastructure related to the development is not individually precluded by other actions (e.g., roads, pipelines, power lines that could otherwise be considered through a ROW).

While the NSO stipulation could be modified for these additional developments, they must still comply with other GRSG management actions (e.g., mitigation, disturbance cap, minerals/energy density, seasonal restrictions, RDFs) if an exception to the NSO is granted.

Waiver: The Authorized Officer may consider and grant a waiver of the NSO stipulation on an existing lease after documenting, in coordination with the appropriate state agency, that the lease with the GRSG NSO stipulation is no longer in IHMA. This would only be applicable on leases that were issued when the parcel was in IHMA, then the IHMA boundaries were subsequently adjusted through the appropriate planning process.

DL-3606 ID-06-A-NSO Raptor Nests (Ferruginous Hawks)

Stipulation: No Surface Occupancy (NSO) within 0.5 miles of active ferruginous hawk nest sites.

Objective [Purpose]: To protect ferruginous hawk nesting activities necessary to maintain the critical life stages of existing raptor populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect the hawk nest sites being protected by this restriction. An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area can be occupied without adversely affecting raptor nesting activity.

Waiver: The restriction may be waived by the Authorized Officer, in consultation with the Idaho Department of Fish and Game, that the entire leasehold no longer contains ferruginous hawk nest sites.

DL-3608 ID-16-B-NSO Water Bodies, Riparian, Floodplain

Stipulation: For the purpose of preventing watershed damage, no occupancy or other surface disturbance will be allowed within 500 feet of intermittent and perennial streams, rivers, riparian areas, wetlands, springs, and irrigation ditches/canals.

Objective [Purpose]: To protect the values and hydrologic functions of water bodies, riparian and wetland areas, plays, and within 100-year flood risk areas.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not affect the resource. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that will satisfactorily offset the anticipated negative impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the water bodies, riparian habitat, wetlands, and/or 100-year floodplains.

Modification: The Authorized Officer may modify the size and shape of the restricted area if an environmental analysis indicates the actual suitability of the land for the resource differs from that in the otherwise applicable restriction.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain water bodies, riparian, wetlands, playas, or 100-year floodplains.

DL-3609 ID-17-B-NSO Soils High Erosion Potential

Stipulation: No Surface Occupancy (NSO) on slopes greater than 40 percent.

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the slope would not result in mass slope failure or accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes greater than 40 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3611 ID-17-A-NSO Soil Slopes >40%

Stipulation: No Surface Occupancy (NSO) on slopes greater than 40 percent.

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the slope would not result in mass slope failure or accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may

also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes greater than 40 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3613 ID-17-B-NSO Soils High Erosion Potential

Stipulation: No Surface Occupancy (NSO) on lands with soils that have been categorized as “Moderately High” on the Inherent Erosion Hazard interpretation by the Natural Resources Conservation Service (NRCS).

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the soil would not result in accelerated erosion and the operator would be able to meet BLM’s reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with soils that have been categorized as “Moderately High” on the Inherent Erosion Hazard interpretation by the Natural Resources Conservation Service (NRCS).

DL-3614 ID-16-B-NSO Water Bodies, Riparian, Floodplain

Stipulation: No Surface Occupancy (NSO) on water bodies, riparian areas, wetlands, playas, and within 100-year flood risk areas.

Objective [Purpose]: To protect the values and hydrologic functions of water bodies, riparian and wetland areas, playas, and within 100-year flood risk areas.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not affect the resource. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that will satisfactorily offset the anticipated negative impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the water bodies, riparian habitat, wetlands, and/or 100-year floodplains.

Modification: The Authorized Officer may modify the size and shape of the restricted area if an environmental analysis indicates the actual suitability of the land for the resource differs from that in the otherwise applicable restriction.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain water bodies, riparian, wetlands, playas, or 100-year floodplains.

DL-3621 Br-04-A-NSO Bighorn Sheep Habitat

Stipulation: No Surface Occupancy (NSO) within existing and potential bighorn sheep habitat.

Objective [Purpose]: To protect bighorn sheep habitat necessary to maintaining the critical life stages of bighorn sheep populations.

Exception: The Authorized Officer may grant an exception:

-if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect bighorn sheep and their habitat; or -if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts; or -for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area no longer contain bighorn sheep habitat or that the proposed action would not adversely affect the species and habitat.

Waiver: The restriction may be waived by the Authorized Officer, in consultation with the Idaho Fish and Game, if it is determined that the entire leasehold no longer contains habitat for bighorn sheep.

DL-3622 ID-17-A-NSO Soil Slopes >40%

Stipulation: No Surface Occupancy (NSO) on slopes greater than 40 percent.

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the slope would not result in mass slope failure or accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes greater than 40 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3627 Fo-14-A-NSO National Scenic and Historic Trails

Stipulation: Surface occupancy or use will be prohibited within 0.25-miles of the Oregon National Historic Trail.

Objective [Purpose]: To protect the National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation, and National Trail Management Corridor that support the nature and purpose of the trail and the resources, qualities, values, associated settings (landscape elements - scenic, historic and cultural, recreation and natural) and primary use or uses of the trail.

Exception: The Authorized Officer may grant an exception if surveys determine that other historic trail remnants are not present or it is determined that the section of trail is sufficiently compromised that the action will not result in an adverse effect to the trail.

Modification: If surveys determine that a portion of the lease area does not contain contributing trail segments, then the stipulation may be modified. This determination shall be based upon field evaluation of the area by a qualified archaeologist/historian and subject to confirmation by the BLM.

Waiver: The Authorized Officer may grant a waiver if surveys determine that the entire lease area does not contain contributing trail segments, then the stipulation may be waived. This determination shall be based upon field evaluation of the area by a qualified archaeologist/historian and subject to confirmation by the BLM.

DL-3636 Fo-16-A-NSO Water Bodies, Riparian, Floodplain

Stipulation: For the purpose of preventing watershed damage, no occupancy or other surface disturbance will be allowed within 500 feet of intermittent and perennial streams, rivers, riparian areas, wetlands, springs, and irrigation ditches/canals.

Exception: The BLM Authorized Officer may grant an exception if it is determined that the action will not result in a failure to meet the performance standards above.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based upon a USGS National Hydrologic Inventory and/or BLM evaluation, in coordination with the Idaho Department of Environmental Quality (DEQ), and the stipulation may be modified based on monitoring results.

Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area is not within 500 feet of perennial streams, riparian areas, wetlands springs, or irrigation ditches/canals. This determination shall be based upon USGS National Hydrologic Inventory and/or BLM evaluation, in coordination with the Idaho DEQ.

DL-3637 Fo-16-B-NSO Protect 100-Year Floodplains

Stipulation: No surface occupancy or use allowed within the active channel or 100-year floodplain. On lands as mapped by the Federal Emergency Management Agency (FEMA) and/or

as determined by a BLM evaluation of the area, for the purpose of ensuring protection of floodplains.

Objective [Purpose]: To protect the values and hydrologic functions of water bodies, riparian and wetland areas, playas, and within 100-year flood risk areas.

Exception: None Modification: None Waiver: None

DL-3638 ID-10-A-NSO Sage-Grouse Habitat, Priority

Stipulation: No Surface Occupancy (NSO) – Priority Habitat Management Areas (PHMA) will be open to mineral leasing and development and geophysical exploration subject to NSO to protect Greater Sage-grouse (GRSG) habitat in PHMA.

Objective: To protect Greater Sage-Grouse habitat in Priority Habitat Management Areas (PHMA) Exceptions:

Exception 1–

The Authorized Officer may consider and grant an exception to the NSO stipulation within 3.1 miles of active and pending active leks in PHMA if it is demonstrated that development and surface occupancy has no direct impacts to or disruption of GRSG or its habitat based on:

1. The location of the proposed authorization is determined to be non-habitat (refer to Glossary), does not provide important connectivity between habitat areas (as determined by a wildlife biologist and confirmed by the BLM using methods such as the HAF and coordinated with the appropriate state authority), and the project includes Required Design Features (RDF) to prevent indirect disturbance to or disruption of adjacent seasonal habitats, regardless of distance from the active or pending active lek, that may impair their biological function; OR 2. Topography/areas of non-habitat create an effective barrier to impacts (e.g., protected from visual and audible disturbances to GRSG and its habitat); OR 3. By co-locating the proposed authorization with existing disturbance, no additional impacts would be realized above those already associated with the existing similarly sized infrastructure, including indirect disturbance to or disruption of adjacent seasonal habitats that may impair their biological function.

Exception 1 would also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 2 –

The Authorized Officer may consider and grant an exception to the NSO stipulation associated with the remainder of PHMA beyond 3.1 miles from active or pending active leks if it would not result in adverse effects to GRSG seasonal habitats based on one of the following criteria:

1. The criteria presented in Exception #1. OR 2. The proposed project seeking the exception would not result in adverse effects to GRSG seasonal habitats based on site-specific information and application of the full range of mitigation tools (e.g., avoidance, minimization, voluntary compensation), as documented by a wildlife biologist and confirmed by the BLM. Proponents may demonstrate no adverse effects by mitigating residual impacts using voluntary compensatory mitigation. To grant this exception based on the use of voluntary compensatory mitigation, the compensation project must be completed and habitat functionality documented before the exception is granted. The compensation must also provide offsetting benefits to the population being impacted.

Exception 2 will also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 3–

An exception could be considered if the proposed location on public lands would be undertaken as an alternative to a similar action occurring on a nearby non-public lands parcel (e.g., due to ownership patterns), and development on the public parcel in question would eliminate impacts on more important and/or limited GRSG habitat (e.g., wet meadows, brood-rearing habitat) on the non-public nearby parcel; this exception must also include measures sufficient to allow the BLM to conclude in its documenting analysis that such benefits will endure for the duration of the proposed action's impacts on public lands (e.g., confirmation of an easement).

Exception 3 will also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Modification: The Authorized Officer may consider and grant a modification to the fluid mineral lease NSO stipulation, allowing for surface occupancy only where:

1. an exception is granted, as described above, for the primary disturbance (e.g., well pad, compressor station), AND 2. the potential associated infrastructure related to the development is not individually precluded by other actions (e.g., roads, pipelines, power lines that could otherwise be considered through a ROW).

While the NSO stipulation could be modified for these additional developments, they must still comply with other GRSG management actions (e.g., mitigation, disturbance cap, minerals/energy density, seasonal restrictions, RDFs) if an exception to the NSO is granted.

Waiver: The Authorized Officer may consider and grant a waiver of the NSO stipulation on an existing lease after documenting, in coordination with the appropriate state agency, that the lease with the GRSG NSO stipulation is no longer in PHMA. This would only be applicable on leases that were issued when the parcel was in PHMA, then the PHMA boundaries were subsequently adjusted through the appropriate planning process.

DL-3639 ID-10-B-NSO Sage-Grouse Habitat, Important

Stipulation: No Surface Occupancy (NSO) - Important Habitat Management Areas (IHMA) will be open to mineral leasing and development and geophysical exploration subject to NSO to protect Greater Sage-grouse (GRSG) habitat in IHMA.

Objective: To protect Greater Sage-Grouse habitat in Important Habitat Management Areas (IHMA).

Exceptions:

Exception 1–

The Authorized Officer may consider and grant an exception to the NSO stipulation within 3.1 miles of active and pending active leks in IHMA and IHMA if it is demonstrated that development and surface occupancy has no direct impacts to or disruption of GRSG or its habitat based on:

1. The location of the proposed authorization is determined to be non-habitat (refer to Glossary), does not provide important connectivity between habitat areas (as determined by a wildlife biologist and confirmed by the BLM using methods such as the HAF and coordinated with the appropriate state authority), and the project includes RDFs to prevent indirect disturbance to or disruption of adjacent seasonal habitats, regardless of distance from the active or pending active lek, that may impair their biological function; OR 2. Topography/areas of non-habitat create an effective barrier to impacts (e.g., protected from visual and audible disturbances to GRSG and its habitat); OR 3. By co-locating the proposed authorization with existing disturbance, no additional impacts would be realized above those already associated with the existing similarly sized infrastructure, including indirect disturbance to or disruption of adjacent seasonal habitats that may impair their biological function.

Exception 1 would also be subject to Anthropogenic Disturbance Development Criteria (MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 2 –

The Authorized Officer may consider and grant an exception to the NSO stipulation associated with the remainder of IHMA beyond 3.1 miles from active or pending active leks if it would not result in adverse effects to GRSG seasonal habitats based on one of the following criteria:

1. The criteria presented in Exception #1. OR 2. The proposed project seeking the exception would not result in adverse effects to GRSG seasonal habitats based on site-specific information and application of the full range of mitigation tools (e.g., avoidance, minimization, voluntary compensation), as documented by a wildlife biologist and confirmed by the BLM. Proponents may demonstrate no adverse effects by mitigating residual impacts using voluntary compensatory mitigation. To grant this exception based on the use of voluntary compensatory mitigation, the compensation project must be completed and habitat functionality documented before the exception is granted. The compensation must also provide offsetting benefits to the population being impacted.

Exception 2 will also be subject to Anthropogenic Disturbance Development Criteria (MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as IHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 3–

An exception could be considered if the proposed location on public lands would be undertaken as an alternative to a similar action occurring on a nearby non-public lands parcel (e.g., due to ownership patterns), and development on the public parcel in question would eliminate impacts on more important and/or limited GRSG habitat (e.g., wet meadows, brood-rearing habitat) on the non-public nearby parcel; this exception must also include measures sufficient to allow the BLM to conclude in its documenting analysis that such benefits will endure for the duration of the proposed action's impacts on public lands (e.g., confirmation of an easement).

Exception 3 will also be subject to Anthropogenic Disturbance Development Criteria (MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as IHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Modification: The Authorized Officer may consider and grant a modification to the fluid mineral lease NSO stipulation, allowing for surface occupancy only where:

1. an exception is granted, as described above, for the primary disturbance (e.g., well pad, compressor station), AND 2. the potential associated infrastructure related to the development is

not individually precluded by other actions (e.g., roads, pipelines, power lines that could otherwise be considered through a ROW).

While the NSO stipulation could be modified for these additional developments, they must still comply with other GRSG management actions (e.g., mitigation, disturbance cap, minerals/energy density, seasonal restrictions, RDFs) if an exception to the NSO is granted.

Waiver: The Authorized Officer may consider and grant a waiver of the NSO stipulation on an existing lease after documenting, in coordination with the appropriate state agency, that the lease with the GRSG NSO stipulation is no longer in IHMA. This would only be applicable on leases that were issued when the parcel was in IHMA, then the IHMA boundaries were subsequently adjusted through the appropriate planning process.

DL-3646 ID-12-B-NSO National Scenic and Historic Trails

Stipulation: No Surface Occupancy (NSO) will be applied directly on National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation and within National Trail Management Corridors. NSO may be applied to additional bordering lands; the extent will be dependent upon the topography and integrity of the setting surrounding individual trail segments along the designated National Historic Trail (NHT) and NHT Corridor. Prior to the establishment of a National Trail Management Corridor, at a minimum, NSO will be applied 1/4-mile on either side of the center line of the trail (for a total of a 1/2-mile wide corridor). The center line will be established either through the GIS-based line provided by the Trail Administering Agency (NPS or BLM) or through GPS-based inventories.

Objective [Purpose]: To protect the National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation, and National Trail Management Corridor that support the nature and purpose of the trail and the resources, qualities, values, associated settings (landscape elements - scenic, historic and cultural, recreation and natural) and primary use or uses of the trail.

Exception: The Authorized Officer may grant an exception if, through Section 106 consultation associated with the National Historic Preservation Act (NHPA) and Management of National Scenic and Historic Trails and Trails Under Study or Recommended as Suitable for Congressional Designation Manual 6280 requirements for compliance with the National Trails System Act, it is determined that the action, as proposed or otherwise restricted, does not adversely affect the resource. An exception may be granted for actions designed to enhance the long-term utility or availability of the trail.

Modification: The Authorized Officer may modify the size and shape of the restricted area if through Section 106 consultation associated with the NHPA and Management of National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation Manual 6280 requirements for compliance with the National Trails System Act indicate the proposed action does not adversely impact the resource.

Waiver: The restriction may be waived if through Section 106 consultation associated with the NHPA and Management of National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation Manual 6280 requirements determine that the described lands are not contributing elements to the resource. This determination can

only come after consultation with the National Park Service, Idaho State Historic Preservation Office (SHPO) and other interested publics.

DL-3648 Sa-14-A-NSO Recreation Sites: Developed

Stipulation: No Surface Occupancy (NSO) will be applied 800 acres surrounding the Sharkey Hot Springs Recreation Site, a site with significant recreational use.

Objective [Purpose]: To protect developed recreational facilities, special-use permit recreation sites (e.g. ski resorts and camps), and areas with significant recreational use which is incompatible with geothermal development.

Exception: The Authorized Officer may grant an exception if the BLM determines that the action, as proposed or otherwise restricted, does not adversely affect the site. An exception may also be granted if BLM negotiates mitigation that would satisfactorily take into account any anticipated adverse effects. The Authorized Officer may also grant an exception if the BLM determines the action does not adversely affect the site or sites.

Modification: The Authorized Officer may modify the size and shape of the restricted area if the BLM determines the area may be modified without causing adverse effects to the site or sites.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain developed recreation sites or if the described lands within the boundaries are determined to be not necessary to protect the site or sites.

DL-3649 Sa-14-B-NSO Recreational Resource Management

Stipulation: No Surface Occupancy (NSO) within areas of important recreational values.

Objective [Purpose]: To protect the areas designated in the Lemhi RMP as having important recreational resource values.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not affect the resource. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that will satisfactorily offset the anticipated negative impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of recreational resource.

Modification: The Authorized Officer may modify the size and shape of the restricted area if an environmental analysis indicates the actual suitability of the land for the resource differs from that in the otherwise applicable restriction.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain recreational resource values.

DL-3650 ID-17-A-NSO Soil Slopes >40%

Stipulation: No Surface Occupancy (NSO) on slopes greater than 40 percent.

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the slope would not result in mass slope failure or accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes greater than 40 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3652 ID-17-B-NSO Soils High Erosion Potential

Stipulation: No Surface Occupancy (NSO) on lands with soils that have been categorized as "Moderately High" on the Inherent Erosion Hazard interpretation by the Natural Resources Conservation Service (NRCS).

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the soil would not result in accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with soils that have been categorized as "Moderately High" on the Inherent Erosion Hazard interpretation by the Natural Resources Conservation Service (NRCS).

DL-3653 ID-16-B-NSO Water Bodies, Riparian, Floodplain

Stipulation: No Surface Occupancy (NSO) on water bodies, riparian areas, wetlands, playas, and within 100-year flood risk areas.

Objective [Purpose]: To protect the values and hydrologic functions of water bodies, riparian and wetland areas, playas, and within 100-year flood risk areas.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not affect the resource. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that will satisfactorily offset the anticipated negative impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the water bodies, riparian habitat, wetlands, and/or 100-year floodplains.

Modification: The Authorized Officer may modify the size and shape of the restricted area if an environmental analysis indicates the actual suitability of the land for the resource differs from that in the otherwise applicable restriction.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain water bodies, riparian, wetlands, playas, or 100-year floodplains.

DL-3656 ID-10-A-NSO Sage-Grouse Habitat, Priority

Stipulation: No Surface Occupancy (NSO) – Priority Habitat Management Areas (PHMA) will be open to mineral leasing and development and geophysical exploration subject to NSO to protect Greater Sage-grouse (GRSG) habitat in PHMA Objective: To protect Greater Sage-Grouse habitat in Priority Habitat Management Areas (PHMA) Exceptions:

Exception 1–

The Authorized Officer may consider and grant an exception to the NSO stipulation within 3.1 miles of active and pending active leks in PHMA if it is demonstrated that development and surface occupancy has no direct impacts to or disruption of GRSG or its habitat based on:

1. The location of the proposed authorization is determined to be non-habitat (refer to Glossary), does not provide important connectivity between habitat areas (as determined by a wildlife biologist and confirmed by the BLM using methods such as the HAF and coordinated with the appropriate state authority), and the project includes Required Design Features (RDF) to prevent indirect disturbance to or disruption of adjacent seasonal habitats, regardless of distance from the active or pending active lek, that may impair their biological function; OR 2. Topography/areas of non-habitat create an effective barrier to impacts (e.g., protected from visual and audible disturbances to GRSG and its habitat); OR 3. By co-locating the proposed authorization with existing disturbance, no additional impacts would be realized above those already associated with the existing similarly sized infrastructure, including indirect disturbance to or disruption of adjacent seasonal habitats that may impair their biological function.

Exception 1 would also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 2 –

The Authorized Officer may consider and grant an exception to the NSO stipulation associated with the remainder of PHMA beyond 3.1 miles from active or pending active leases if it would not result in adverse effects to GRSB seasonal habitats based on one of the following criteria:

1. The criteria presented in Exception #1. OR 2. The proposed project seeking the exception would not result in adverse effects to GRSB seasonal habitats based on site-specific information and application of the full range of mitigation tools (e.g., avoidance, minimization, voluntary compensation), as documented by a wildlife biologist and confirmed by the BLM. Proponents may demonstrate no adverse effects by mitigating residual impacts using voluntary compensatory mitigation. To grant this exception based on the use of voluntary compensatory mitigation, the compensation project must be completed and habitat functionality documented before the exception is granted. The compensation must also provide offsetting benefits to the population being impacted.

Exception 2 will also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSB Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 3–

An exception could be considered if the proposed location on public lands would be undertaken as an alternative to a similar action occurring on a nearby non-public lands parcel (e.g., due to ownership patterns), and development on the public parcel in question would eliminate impacts on more important and/or limited GRSB habitat (e.g., wet meadows, brood-rearing habitat) on the non-public nearby parcel; this exception must also include measures sufficient to allow the BLM to conclude in its documenting analysis that such benefits will endure for the duration of the proposed action's impacts on public lands (e.g., confirmation of an easement).

Exception 3 will also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSB Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Modification: The Authorized Officer may consider and grant a modification to the fluid mineral lease NSO stipulation, allowing for surface occupancy only where:

1. an exception is granted, as described above, for the primary disturbance (e.g., well pad, compressor station), AND 2. the potential associated infrastructure related to the development is

not individually precluded by other actions (e.g., roads, pipelines, power lines that could otherwise be considered through a ROW).

While the NSO stipulation could be modified for these additional developments, they must still comply with other GRSG management actions (e.g., mitigation, disturbance cap, minerals/energy density, seasonal restrictions, RDFs) if an exception to the NSO is granted.

Waiver: The Authorized Officer may consider and grant a waiver of the NSO stipulation on an existing lease after documenting, in coordination with the appropriate state agency, that the lease with the GRSG NSO stipulation is no longer in PHMA. This would only be applicable on leases that were issued when the parcel was in PHMA, then the PHMA boundaries were subsequently adjusted through the appropriate planning process.

DL-3657 ID-10-B-NSO Sage-Grouse Habitat, Important

Stipulation: No Surface Occupancy (NSO) - Important Habitat Management Areas (IHMA) will be open to mineral leasing and development and geophysical exploration subject to NSO to protect Greater Sage-grouse (GRSG) habitat in IHMA.

Objective: To protect Greater Sage-Grouse habitat in Important Habitat Management Areas (IHMA).

Exceptions:

Exception 1–

The Authorized Officer may consider and grant an exception to the NSO stipulation within 3.1 miles of active and pending active leks in IHMA if it is demonstrated that development and surface occupancy has no direct impacts to or disruption of GRSG or its habitat based on:

1. The location of the proposed authorization is determined to be non-habitat (refer to Glossary), does not provide important connectivity between habitat areas (as determined by a wildlife biologist and confirmed by the BLM using methods such as the HAF and coordinated with the appropriate state authority), and the project includes Required Design Features (RDF) to prevent indirect disturbance to or disruption of adjacent seasonal habitats, regardless of distance from the active or pending active lek, that may impair their biological function; OR 2. Topography/areas of non-habitat create an effective barrier to impacts (e.g., protected from visual and audible disturbances to GRSG and its habitat); OR 3. By co-locating the proposed authorization with existing disturbance, no additional impacts would be realized above those already associated with the existing similarly sized infrastructure, including indirect disturbance to or disruption of adjacent seasonal habitats that may impair their biological function.

Exception 1 would also be subject to Anthropogenic Disturbance Development Criteria (MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 2 –

The Authorized Officer may consider and grant an exception to the NSO stipulation associated with the remainder of IHMA beyond 3.1 miles from active or pending active leks if it would not result in adverse effects to GRSG seasonal habitats based on one of the following criteria:

1. The criteria presented in Exception #1. OR 2. The proposed project seeking the exception would not result in adverse effects to GRSG seasonal habitats based on site-specific information and application of the full range of mitigation tools (e.g., avoidance, minimization, voluntary compensation), as documented by a wildlife biologist and confirmed by the BLM. Proponents may demonstrate no adverse effects by mitigating residual impacts using voluntary compensatory mitigation. To grant this exception based on the use of voluntary compensatory mitigation, the compensation project must be completed and habitat functionality documented before the exception is granted. The compensation must also provide offsetting benefits to the population being impacted.

Exception 2 will also be subject to Anthropogenic Disturbance Development Criteria (MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as IHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 3–

An exception could be considered if the proposed location on public lands would be undertaken as an alternative to a similar action occurring on a nearby non-public lands parcel (e.g., due to ownership patterns), and development on the public parcel in question would eliminate impacts on more important and/or limited GRSG habitat (e.g., wet meadows, brood-rearing habitat) on the non-public nearby parcel; this exception must also include measures sufficient to allow the BLM to conclude in its documenting analysis that such benefits will endure for the duration of the proposed action's impacts on public lands (e.g., confirmation of an easement).

Exception 3 will also be subject to Anthropogenic Disturbance Development Criteria (MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as IHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Modification: The Authorized Officer may consider and grant a modification to the fluid mineral lease NSO stipulation, allowing for surface occupancy only where:

1. an exception is granted, as described above, for the primary disturbance (e.g., well pad, compressor station), AND 2. the potential associated infrastructure related to the development is not individually precluded by other actions (e.g., roads, pipelines, power lines that could otherwise be considered through a ROW).

While the NSO stipulation could be modified for these additional developments, they must still comply with other GRSG management actions (e.g., mitigation, disturbance cap, minerals/energy density, seasonal restrictions, RDFs) if an exception to the NSO is granted.

Waiver: The Authorized Officer may consider and grant a waiver of the NSO stipulation on an existing lease after documenting, in coordination with the appropriate state agency, that the lease with the GRSG NSO stipulation is no longer in IHMA. This would only be applicable on leases that were issued when the parcel was in IHMA, then the IHMA boundaries were subsequently adjusted through the appropriate planning process.

DL-3661 Sa-12-A-NSO National Scenic and Historic Trails

Stipulation: No Surface Occupancy (NSO) will be applied directly on the Congressionally Designated Nez Perce National Historic Trail within the National Trail Management Corridor. NSO may be applied to additional bordering lands; the extent will be dependent upon the topography and integrity of the setting surrounding individual trail segments along the designated National Historic Trail (NHT) and NHT Corridor. Prior to the establishment of a National Trail Management Corridor, at a minimum, NSO will be applied 1/4-mile on either side of the center line of the trail (for a total of a 1/2-mile-wide corridor). The center line will be established either through the GIS-based line provided by the Trail Administering Agency (National Forest Service or BLM) or through GPS-based inventories.

Objective [Purpose]: To protect the Congressionally Designated Nez Perce National Historic Trail and National Trail Management Corridor that support the nature and purpose of the trail and the resources, qualities, values, associated settings (landscape elements - scenic, historic and cultural, recreation and natural) and primary use or uses of the trail.

Exception: The Authorized Officer may grant an exception if, through Section 106 consultation associated with the National Historic Preservation Act (NHPA) and Management of National Scenic and Historic Trails and Trails Under Study or Recommended as Suitable for Congressional Designation Manual 6280 requirements for compliance with the National Trails System Act, it is determined that the action, as proposed or otherwise restricted, does not adversely affect the resource. An exception may be granted for actions designed to enhance the long-term utility or availability of the trail.

Modification: The Authorized Officer may modify the size and shape of the restricted area if through Section 106 consultation associated with the NHPA and Management of National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation Manual 6280 requirements for compliance with the National Trails System Act indicate the proposed action does not adversely impact the resource.

Waiver: The restriction may be waived if through Section 106 consultation associated with the NHPA and Management of National Scenic and Historic Trails and Trails under Study or Recommended as Suitable for Congressional Designation Manual 6280 requirements determine that the described lands are not contributing elements to the resource. This determination can only come after consultation with the National Forest Service, Idaho State Historic Preservation Office (SHPO), Tribes, and other interested publics.

DL-3662 ID-17-A-NSO Soil Slopes >40%

Stipulation: No Surface Occupancy (NSO) on slopes greater than 40 percent.

Objective [Purpose]: To maintain soil productivity; provide necessary protection to prevent excessive soil erosion on steep slopes; to avoid areas subject to slope failure, mass wasting, or piping; or other excessive reclamation problems.

Exception: The Authorized Officer may grant an exception if a staff review determines that the proposed action is of a scale (pipeline, vs. road, vs. well pad) or sited in a location or a site-specific evaluation determines that the slope would not result in mass slope failure or accelerated erosion and the operator would be able to meet BLM's reclamation standards.

Modification: The Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation of the area. The stipulation and performance standards identified above may also be modified based on negative or positive monitoring results from similar proposed actions on similar sites or increased national or state performance standards.

Waiver: The restriction may be waived if it is determined that the described lands do not include lands with slopes greater than 40 percent. This determination shall be based upon USGS mapping and a BLM evaluation of the area.

DL-3664 ID-16-B-NSO Water Bodies, Riparian, Floodplain

Stipulation: No Surface Occupancy (NSO) on water bodies, riparian areas, wetlands, playas, and within 100-year flood risk areas.

Objective [Purpose]: To protect the values and hydrologic functions of water bodies, riparian and wetland areas, playas, and within 100-year flood risk areas.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not affect the resource. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that will satisfactorily offset the anticipated negative impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the water bodies, riparian habitat, wetlands, and/or 100-year floodplains.

Modification: The Authorized Officer may modify the size and shape of the restricted area if an environmental analysis indicates the actual suitability of the land for the resource differs from that in the otherwise applicable restriction.

Waiver: Restrictions may be waived if it is determined that the described lands do not, in fact, contain water bodies, riparian, wetlands, playas, or 100-year floodplains.

DL-3667 ID-10-A-NSO Sage-Grouse Habitat, Priority

Stipulation: No Surface Occupancy (NSO) - Priority Habitat Management Areas (PHMA) will be open to mineral leasing and development and geophysical exploration subject to NSO to protect Greater Sage-grouse (GRSG) habitat in PHMA.

Objective: To protect Greater Sage-Grouse habitat in Priority Habitat Management Areas (PHMA).

Exceptions:

Exception 1–

The Authorized Officer may consider and grant an exception to the NSO stipulation within 3.1 miles of active and pending active leks in PHMA if it is demonstrated that development and surface occupancy has no direct impacts to or disruption of GRSG or its habitat based on:

1. The location of the proposed authorization is determined to be non-habitat (refer to Glossary), does not provide important connectivity between habitat areas (as determined by a wildlife biologist and confirmed by the BLM using methods such as the HAF and coordinated with the appropriate state authority), and the project includes RDFs to prevent indirect disturbance to or disruption of adjacent seasonal habitats, regardless of distance from the active or pending active lek, that may impair their biological function; OR 2. Topography/areas of non-habitat create an effective barrier to impacts (e.g., protected from visual and audible disturbances to GRSG and its habitat); OR 3. By co-locating the proposed authorization with existing disturbance, no additional impacts would be realized above those already associated with the existing similarly sized infrastructure, including indirect disturbance to or disruption of adjacent seasonal habitats that may impair their biological function.

Exception 1 would also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 2 –

The Authorized Officer may consider and grant an exception to the NSO stipulation associated with the remainder of PHMA beyond 3.1 miles from active or pending active leks if it would not result in adverse effects to GRSG seasonal habitats based on one of the following criteria:

1. The criteria presented in Exception #1. OR 2. The proposed project seeking the exception would not result in adverse effects to GRSG seasonal habitats based on site-specific information and application of the full range of mitigation tools (e.g., avoidance, minimization, voluntary compensation), as documented by a wildlife biologist and confirmed by the BLM. Proponents may demonstrate no adverse effects by mitigating residual impacts using voluntary

compensatory mitigation. To grant this exception based on the use of voluntary compensatory mitigation, the compensation project must be completed and habitat functionality documented before the exception is granted. The compensation must also provide offsetting benefits to the population being impacted.

Exception 2 will also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Exception 3–

An exception could be considered if the proposed location on public lands would be undertaken as an alternative to a similar action occurring on a nearby non-public lands parcel (e.g., due to ownership patterns), and development on the public parcel in question would eliminate impacts on more important and/or limited GRSG habitat (e.g., wet meadows, brood-rearing habitat) on the non-public nearby parcel; this exception must also include measures sufficient to allow the BLM to conclude in its documenting analysis that such benefits will endure for the duration of the proposed action's impacts on public lands (e.g., confirmation of an easement).

Exception 3 will also be subject to Anthropogenic Disturbance Screening and Development Criteria (MD SSS 29 and MD SSS 30).

-GRSG Disturbance Cap Exceptions: For fluid mineral (including geothermal) disturbance cap exceptions and waivers, follow the direction for Disturbance Cap exceptions and conditions section.

-Disturbance Cap Modifications: None.

-Disturbance Cap Waivers: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area mapped as PHMA when the lease was issued is no longer mapped as such through the appropriate planning process.

Modification: The Authorized Officer may consider and grant a modification to the fluid mineral lease NSO stipulation, allowing for surface occupancy only where:

1. an exception is granted, as described above, for the primary disturbance (e.g., well pad, compressor station), AND
2. the potential associated infrastructure related to the development is not individually precluded by other actions (e.g., roads, pipelines, power lines that could otherwise be considered through a ROW).

While the NSO stipulation could be modified for these additional developments, they must still comply with other GRSG management actions (e.g., mitigation, disturbance cap, minerals/energy density, seasonal restrictions, RDFs) if an exception to the NSO is granted.

Waiver: The Authorized Officer may consider and grant a waiver of the NSO stipulation on an existing lease after documenting, in coordination with the appropriate state agency, that the lease with the GRSG NSO stipulation is no longer in PHMA. This would only be applicable on leases

that were issued when the parcel was in PHMA, then the PHMA boundaries were subsequently adjusted through the appropriate planning process.

Timing Limitation

DL-3584 ID-10-E-TL Sage-Grouse Habitat, GHMA Nesting

Stipulation: Timing Limitations (TL) - Avoid mechanized anthropogenic disturbance in nesting habitat during the nesting season (May 1-June 30) when implementing infrastructure construction or maintenance or conducting geophysical exploration activities.

Objective: To protect Greater Sage-grouse nesting habitat in GHMA.

Exception: The Authorized Officer may consider and provide temporary relief from seasonal constraints by granting an exception after documenting the review of available information associated with the site proposed for the exception. While the BLM considers information from all sources, the state wildlife agency can provide information directly associated with GRSG use, including whether GRSG populations are not using the seasonal habitat during that year's seasonal life cycle period. Based on this information and recommendation, and documented variability in precipitation (e.g., early/late spring, long/heavy winter), use patterns, or other applicable information the Authorized Officer may consider a one-time exception if development associated with it will not affect GRSG habitat.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal modification is justified on the basis that it serves to better protect or enhance GRSG and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

- A proposed authorization is expected to have beneficial or neutral impacts on GRSG and its habitat.
- Topography or other factors eliminate direct and indirect visible and audible impacts to GRSG and its habitat.
- There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area that was mapped as a GRSG habitat management area (regardless of type) when the lease was issued is no longer mapped as such through the appropriate planning process.

DL-3585 ID-10-F-TL Sage-Grouse Habitat, GHMA Wintering

Stipulation: Timing Limitations (TL) - Avoid mechanized anthropogenic disturbance during the winter, in wintering areas (November 1 to March 1) when implementing infrastructure construction or maintenance or conducting geophysical exploration activities.

Objective: To protect Greater Sage-grouse wintering areas in GHMA.

Exception: The Authorized Officer may consider and provide temporary relief from seasonal constraints by granting an exception after documenting the review of available information associated with the site proposed for the exception. While the BLM considers information from all sources, the state wildlife agency can provide information directly associated with GRSG use, including whether GRSG populations are not using the seasonal habitat during that year's seasonal life cycle period. Based on this information and recommendation, and documented variability in precipitation (e.g., early/late spring, long/heavy winter), use patterns, or other applicable information the Authorized Officer may consider a one-time exception if development associated with it will not affect GRSG habitat.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal modification is justified on the basis that it serves to better protect or enhance GRSG and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

- A proposed authorization is expected to have beneficial or neutral impacts on GRSG and its habitat.
- Topography or other factors eliminate direct and indirect visible and audible impacts to GRSG and its habitat.
- There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area that was mapped as a GRSG habitat management area (regardless of type) when the lease was issued is no longer mapped as such through the appropriate planning process.

DL-3586 Br-02-A-TL Mule Deer Winter Habitat, No Off-Road Use

Stipulation: Timing Limitation (TL) -No off-road vehicular activity within mule deer winter habitat from December 15 through April 15.

Objective [Purpose]: To protect mule deer winter habitat necessary to maintaining the critical life stages of mule deer populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect mule deer and their habitat. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that would satisfactorily offset the anticipated impacts to mule deer and their habitat. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area no longer contain mule deer winter habitat or that the proposed action would not affect the species and habitat. The dates for the timing restriction may also be modified by the Authorized Officer if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer if it is determined that the described lands do not contain suitable mule deer winter habitat or are otherwise incapable of serving the requirements of for the species and therefore no longer warrant consideration as a component necessary for their protection. This may require consultation with the appropriate state agency.

DL-3587 Br-01-A-TL Pronghorn Winter Habitat; No Off-Road Use

Stipulation: Timing Limitation (TL) -No off-road vehicular activity within pronghorn winter habitat from December 15 through March 1.

Objective [Purpose]: To protect pronghorn winter habitat necessary to maintaining the critical life stages of pronghorn populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect pronghorn and their habitat. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that would satisfactorily offset the anticipated impacts to pronghorn and their habitat. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area no longer contain pronghorn winter habitat or that the proposed action would not affect the species and habitat. The dates for the timing restriction may also be modified by the Authorized Officer if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer if it is determined that the described lands do not contain suitable mule deer winter habitat or are otherwise incapable of serving the requirements of for the species and therefore no longer warrant consideration as a component necessary for their protection. This may require consultation with the appropriate state agency.

DL-3590 Ow-07-A-TL Burrowing Owl Seasonal Habitat

Stipulation: Timing Limitation (TL). No surface occupancy or disturbance within ¼ mile of agency identified burrowing owl burrows during the nesting season (3/15-6/30).

Objective [Purpose]: To protect burrowing owl nests and adjacent foraging habitat.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect critical habitat for the burrowing owl protected by this restriction. An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area can be occupied without adversely affecting critical habitat for the burrowing owl. The dates for the timing restriction may be modified if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer, in consultation with the Idaho Department of Fish and Game, that the entire leasehold no longer contains critical habitat for the burrowing owl.

DL-3591 Ow-08-A-TL Curlew Seasonal Habitat

Stipulation: Timing Limitation (TL) within long-billed curlew habitat. No surface activity within long-billed curlew nesting habitat, as determined by presence of birds from March 16-June 30.

Objective [Purpose]: To protect high value long-billed curlew nesting habitat where other existing measures are inadequate to meet agency management objectives.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect nesting habitat for the long-billed curlew protected by this restriction. An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area can be occupied without adversely affecting nesting habitat for long-billed curlews. The dates for the timing restriction may be modified if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer, in consultation with the Idaho Department of Fish and Game, that the entire leasehold no longer contains nesting habitat for long-billed curlews.

DL-3593 Ow-09-A-TL Big Game Winter Habitat

Stipulation: Timing Limitation (TL) - No surface activity within big game winter habitat from December 1 through April 30.

Objective [Purpose]: To protect big game winter habitat necessary to maintaining the critical life stages of big game populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect big game species and their habitat. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that would satisfactorily offset the anticipated impacts to big game and their habitat. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area no longer contain big game winter habitat or that the proposed action would not affect the species and habitat. The dates for the timing restriction may also be modified by the Authorized Officer if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer if it is determined that the described lands do not contain suitable big game winter habitat or are otherwise incapable of serving the requirements of for the species and therefore no longer warrant consideration as a component necessary for their protection. This may require consultation with the appropriate state agency.

DL-3594 Ow-06-A-TL Raptor Nests - Seasonal

Stipulation: Timing Limitation (TL). No surface occupancy or disturbance within 0.5 miles of a golden eagle nest site from February 1 to June 30, and other species' nests between March 15 and June 30.

Objective [Purpose]: To protect raptor nesting activities and adjacent foraging habitat necessary to maintaining the critical life stages of existing raptor populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect the raptor nest sites being protected by this restriction. An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area can be occupied without adversely affecting raptor nesting activity. The dates for the timing restriction may be modified if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer, in consultation with the Idaho Department of Fish and Game, that the entire leasehold no longer contains raptor nest sites.

DL-3602 BU-07-A-TL Burrowing Owl - Nesting

Stipulation: Timing Limitation (TL) within occupied burrowing owl nest burrows. No disruptive activity will not be allowed within occupied burrowing owl nest burrows from April 1 to June 30.

Objective [Purpose]: To protect burrowing owl nesting where other existing measures are inadequate to meet agency management objectives.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect critical habitat for burrowing owls protected by this restriction. An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area can be occupied without adversely affecting burrowing owls. The dates for the timing restriction may be modified if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer, in consultation with the Idaho Department of Fish and Game, that the entire leasehold no longer contains burrowing owl nest burrows.

DL-3603 BU-08-B-TL Curlew - Nesting TL

Stipulation: Timing Limitation (TL) within area near long-billed curlew nests. No disruptive activity will be allowed from April 1 to June 30 if nesting curlews are located.

Objective [Purpose]: To protect nesting long-billed curlews where other existing measures are inadequate to meet agency management objectives.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect long-billed curlew nests protected by this restriction. An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area can be occupied without adversely affecting nests of long-billed curlews. The dates for the timing restriction may be modified if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer, in consultation with the Idaho Department of Fish and Game, that the entire leasehold no longer contains critical habitat for long-billed curlews.

DL-3604 BU-02-A-TL Mule Deer Crucial Winter Habitat

Stipulation: Timing Limitation (TL) -No surface activity within mule deer crucial winter habitat from November 15 through April 30.

Objective [Purpose]: To protect mule deer crucial winter habitat necessary to maintaining the critical life stages of mule deer populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect mule deer and their habitat. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that would satisfactorily offset the anticipated impacts to mule deer and their habitat. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area no longer contain mule deer crucial winter habitat or that the proposed action would not affect the species and habitat. The dates for the timing restriction may also be modified by the Authorized Officer if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer if it is determined that the described lands do not contain suitable mule deer crucial winter habitat or are otherwise incapable of serving the requirements of for the species and therefore no longer warrant consideration as a component necessary for their protection. This may require consultation with the appropriate state agency.

DL-3605 BU-01-A-TL Pronghorn Antelope Fawning Areas and Winter Habitat

Stipulation: Timing Limitation (TL) -No surface activity within pronghorn antelope fawning areas from May 15 through June 30 and within pronghorn winter habitat from November 15 through April 30.

Objective [Purpose]: To protect pronghorn antelope fawning areas and winter habitat necessary to maintaining the critical life stages of pronghorn populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect pronghorn and their habitat. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that would satisfactorily offset the anticipated impacts to pronghorn and their habitat. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area

no longer contain pronghorn fawning areas or winter habitat so that the proposed action would not affect the species and habitat. The dates for the timing restriction may also be modified by the Authorized Officer if new information indicates the dates are not valid for the leasehold for one or both of the seasonal habitats or one or both are absent.

Waiver: The restriction may be waived by the Authorized Officer if it is determined that the described lands do not contain suitable pronghorn fawning areas and winter habitat or are otherwise incapable of serving the requirements of for the species and therefore no longer warrant consideration as a component necessary for their protection. This may require consultation with the appropriate state agency.

DL-3607 Br-06-A-TL Raptor Nest Sites

Stipulation: Timing Limitation. No surface activity from March 1 through August 15 within 0.5 miles of raptor nest sites.

Objective [Purpose]: To project known and suspected nests of birds of prey in the resource area and protect vegetative cover that provide adequate food for the birds' major prey species.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect raptor nest sites being protected by the restriction. An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Wildlife, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The buffer distance may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area can be occupied without adversely affecting raptor nesting activity. Boundaries can also be modified if the Authorized Officer determines that new information, as described in Information Bulletin No. ID-2020-014 (BLM ISO, 2020), determines that adjustments are warranted to avoid adversely affecting raptor nesting activity. The dates for the timing restriction may be modified if new information indicates the dates are not valid for the leasehold.

Waiver: The stipulation may be waived if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that the entire leasehold no longer contains raptor nest sites.

DL-3617 ID-10-D-TL Sage-Grouse Habitat, GHMA Leks

Stipulation: Timing Limitations (TL) - No repeated or sustained behavioral disturbance (e.g., visual, noise over 10 dbA at lek, etc.) to lekking birds from 6:00 pm to 9:00 am within 2 miles (3.2 km) of leks in any HMA during the lekking season (approximately March 15-May 1 in lower elevations and March 25-May 15 in higher elevations).

Objective: To protect Greater Sage-grouse leks.

Exception: The Authorized Officer may consider and provide temporary relief from seasonal constraints by granting an exception after documenting the review of available information

associated with the site proposed for the exception. While the BLM considers information from all sources, the state wildlife agency can provide information directly associated with GRSG use, including whether GRSG populations are not using the seasonal habitat during that year's seasonal life cycle period. Based on this information and recommendation, and documented variability in precipitation (e.g., early/late spring, long/heavy winter), use patterns, or other applicable information the Authorized Officer may consider a one-time exception if development associated with it will not affect GRSG habitat.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal modification is justified on the basis that it serves to better protect or enhance GRSG and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

- A proposed authorization is expected to have beneficial or neutral impacts on GRSG and its habitat.
- Topography or other factors eliminate direct and indirect visible and audible impacts to GRSG and its habitat.
- There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The stipulation may be waived if the authorized officer, in consultation with the appropriate state agency (IDFG), determines that the entire leasehold no longer contains suitable habitat nor is used by GRSG.

DL-3618 ID-10-E-TL Sage-Grouse Habitat, GHMA Nesting

Stipulation: Timing Limitations (TL) - Avoid mechanized anthropogenic disturbance in nesting habitat during the nesting season (May 1-June 30) when implementing infrastructure construction or maintenance or conducting geophysical exploration activities.

Objective: To protect Greater Sage-grouse nesting habitat in GHMA.

Exception: The Authorized Officer may consider and provide temporary relief from seasonal constraints by granting an exception after documenting the review of available information associated with the site proposed for the exception. While the BLM considers information from all sources, the state wildlife agency can provide information directly associated with GRSG use, including whether GRSG populations are not using the seasonal habitat during that year's seasonal life cycle period. Based on this information and recommendation, and documented variability in precipitation (e.g., early/late spring, long/heavy winter), use patterns, or other

applicable information the Authorized Officer may consider a one-time exception if development associated with it will not affect GRS habitat.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal modification is justified on the basis that it serves to better protect or enhance GRS and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

- A proposed authorization is expected to have beneficial or neutral impacts on GRS and its habitat.

- Topography or other factors eliminate direct and indirect visible and audible impacts to GRS and its habitat.

- There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area that was mapped as a GRS habitat management area (regardless of type) when the lease was issued is no longer mapped as such through the appropriate planning process.

DL-3619 ID-10-F-TL Sage-Grouse Habitat, GHMA Wintering

Stipulation: Timing Limitations (TL) - Avoid mechanized anthropogenic disturbance during the winter, in wintering areas (November 1 to March 1) when implementing infrastructure construction or maintenance or conducting geophysical exploration activities.

Objective: To protect Greater Sage-grouse wintering areas in GHMA.

Exception: The Authorized Officer may consider and provide temporary relief from seasonal constraints by granting an exception after documenting the review of available information associated with the site proposed for the exception. While the BLM considers information from all sources, the state wildlife agency can provide information directly associated with GRS use, including whether GRS populations are not using the seasonal habitat during that year's seasonal life cycle period. Based on this information and recommendation, and documented variability in precipitation (e.g., early/late spring, long/heavy winter), use patterns, or other applicable information the Authorized Officer may consider a one-time exception if development associated with it will not affect GRS habitat.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being

protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal modification is justified on the basis that it serves to better protect or enhance GRSG and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

- A proposed authorization is expected to have beneficial or neutral impacts on GRSG and its habitat.

- Topography or other factors eliminate direct and indirect visible and audible impacts to GRSG and its habitat.

- There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area that was mapped as a GRSG habitat management area (regardless of type) when the lease was issued is no longer mapped as such through the appropriate planning process.

DL-3631 Fo-07-A-TL Sensitive Species (Burrowing Owls)

Stipulation: Timing Limitation (TL) within burrowing owl nests surface-disturbing and disruptive activities are prohibited or restricted within 0.25 miles of active burrowing owl nests from February 1 through July 31 as mapped on the FRFO GIS database or determined by field evaluation in coordination with the IDFG and/or USFWS.

Objective [Purpose]: To protect burrowing owl nests where other existing measures are inadequate to meet agency management objectives.

Exception: The BLM Authorized Officer may grant an exception if a staff review determines that the action will not disturb nesting burrowing owls. This determination shall be based upon field study by a qualified representative, subject to confirmation from BLM. Confirmation may include coordination with the IDFG or USFWS.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based on local evaluation including topography, visibility, disturbance and human activity levels, and other factors. The stipulation may be modified based on monitoring results. The determination shall be based upon field studies of the area by a qualified representative and subject to confirmation from BLM. Confirmation may include coordination with the IDFG or USFWS.

Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area is not within 0.25-mile of a burrowing owl nest. Confirmation may include coordination with the IDFG or USFWS.

DL-3632 Fo-06-B-TL Sensitive Species Ferruginous Hawks

Stipulation: Timing Limitation (TL) within ferruginous hawk nests. No surface activity or disruptive activities are prohibited within 1.0 mile of active ferruginous hawk nests from February 1 through July 31 as mapped on the FRFO GIS database or determined by field evaluation in coordination with the IDFG and/or USFWS.

Objective [Purpose]: To protect ferruginous hawk nests where other existing measures are inadequate to meet agency management objectives.

Exception: The BLM Authorized Officer may grant an exception if a staff review determines that the action will not disturb nesting ferruginous hawks. This determination shall be based upon field study by a qualified representative, subject to confirmation from BLM. Confirmation may include coordination with the IDFG or USFWS.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based on local evaluation including topography, visibility, disturbance and human activity levels, and other factors. The stipulation may be modified based on monitoring results. The determination shall be based upon field studies of the area by a qualified representative and subject to confirmation from BLM. Confirmation may include coordination with the IDFG or USFWS.

Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area is not within 1.0 mile of a ferruginous hawk nest. Confirmation may include coordination with the IDFG or USFWS.

DL-3633 Fo-06-C-TL Sensitive Species (Golden Eagles)

Stipulation: Timing Limitation (TL) within golden eagle nests. No surface activity or disruptive activities within 0.5 mile of active golden eagle nests from February 1 through July 31 as mapped on the FRFO GIS database or determined by field evaluation in coordination with the IDFG and/or USFWS.

Objective [Purpose]: To protect golden eagle nests where other existing measures are inadequate to meet agency management objectives.

Exception: The BLM Authorized Officer may grant an exception if a staff review determines that the action will not disturb nesting golden eagles. This determination shall be based upon field study by a qualified representative, subject to confirmation from BLM. Confirmation may include coordination with the IDFG or USFWS.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based on local evaluation including topography, visibility, disturbance and human activity levels, and other factors. The stipulation may be modified based on monitoring results. The determination shall be based upon field studies of the area by a qualified representative and subject to confirmation from BLM. Confirmation may include coordination with the IDFG or USFWS.

Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area is not within 0.5 mile of a golden eagle nest. Confirmation may include coordination with the IDFG or USFWS.

DL-3634 Fo-08-A-TL Sensitive Species (Long-Billed Curlew)

Stipulation: Avoid or minimize disruption of long-billed curlew nesting activity by siting or prioritizing vegetation clearing, facility construction, and concentrated operational activities (e.g., drilling, completion, utility installation) to avoid the involvement of higher value habitats, particularly during the nesting season (March 1- June 30).

Objective [Purpose]: To protect long-billed curlew where other existing measures are inadequate to meet agency management objectives.

Exception: The BLM Authorized Officer may grant an exception if a staff review determines that the action will not disturb long-billed curlew nesting activity. This determination shall be based upon field study by a qualified representative, subject to confirmation from BLM. Confirmation may include coordination with the IDFG or USFWS.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based on local evaluation including topography, visibility, disturbance and human activity levels, and other factors. The stipulation may be modified based on monitoring results. The determination shall be based upon field studies of the area by a qualified representative and subject to confirmation from BLM. Confirmation may include coordination with the IDFG or USFWS.

Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area does not contain long-billed curlew nests. Confirmation may include coordination with the IDFG or USFWS.

DL-3641 ID-10-E-TL Sage-Grouse Habitat, GHMA Nesting

Stipulation: Timing Limitations (TL) - Avoid mechanized anthropogenic disturbance in nesting habitat during the nesting season (May 1-June 30) when implementing infrastructure construction or maintenance or conducting geophysical exploration activities.

Objective: To protect Greater Sage-grouse nesting habitat in GHMA.

Exception: The Authorized Officer may consider and provide temporary relief from seasonal constraints by granting an exception after documenting the review of available information associated with the site proposed for the exception. While the BLM considers information from all sources, the state wildlife agency can provide information directly associated with GRSG use, including whether GRSG populations are not using the seasonal habitat during that year's seasonal life cycle period. Based on this information and recommendation, and documented variability in precipitation (e.g., early/late spring, long/heavy winter), use patterns, or other applicable information the Authorized Officer may consider a one-time exception if development associated with it will not affect GRSG habitat.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal

modification is justified on the basis that it serves to better protect or enhance GRSG and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

- A proposed authorization is expected to have beneficial or neutral impacts on GRSG and its habitat.

- Topography or other factors eliminate direct and indirect visible and audible impacts to GRSG and its habitat.

- There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area that was mapped as a GRSG habitat management area (regardless of type) when the lease was issued is no longer mapped as such through the appropriate planning process.

DL-3642 ID-10-F-TL Sage-Grouse Habitat, GHMA Wintering

Stipulation: Timing Limitations (TL) - Avoid mechanized anthropogenic disturbance during the winter, in wintering areas (November 1 to March 1) when implementing infrastructure construction or maintenance or conducting geophysical exploration activities.

Objective: To protect Greater Sage-grouse wintering areas in GHMA.

Exception: The Authorized Officer may consider and provide temporary relief from seasonal constraints by granting an exception after documenting the review of available information associated with the site proposed for the exception. While the BLM considers information from all sources, the state wildlife agency can provide information directly associated with GRSG use, including whether GRSG populations are not using the seasonal habitat during that year's seasonal life cycle period. Based on this information and recommendation, and documented variability in precipitation (e.g., early/late spring, long/heavy winter), use patterns, or other applicable information the Authorized Officer may consider a one-time exception if development associated with it will not affect GRSG habitat.

Modification: The BLM may grant modifications on a case-by-case basis to seasonal restrictions if the BLM, in coordination with the state wildlife agency and other appropriate state authorities determines that granting the modification will not adversely impact the population being protected. The Authorized Officer may consider and grant a modification to the dates and areas associated with seasonal timing restrictions based on the criteria described below- after documenting the review of available information associated with the site proposed for the modification if the geographic and temporal conditions demonstrate that any seasonal modification is justified on the basis that it serves to better protect or enhance GRSG and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario, modifications can occur if one or more of the following conditions can be documented:

- A proposed authorization is expected to have beneficial or neutral impacts on GRSG and its habitat.

-Topography or other factors eliminate direct and indirect visible and audible impacts to GRSG and its habitat.

-There are documented local variations that indicate the seasonal life cycle periods are different than presented.

Modifications are needed to address an immediate public health and/or safety concern in a timely manner (e.g., maintaining a road impacted by flooding).

Waiver: The Authorized Officer may consider and grant a waiver of the stipulation on an existing lease if the area that was mapped as a GRSG habitat management area (regardless of type) when the lease was issued is no longer mapped as such through the appropriate planning process.

DL-3643 Fo-09-A-TL Big Game Winter Habitat

Stipulation: Timing Limitation (TL) - Surface-disturbing and disruptive activities are prohibited or restricted from November 15 to May 1 within big game (mule deer, elk, and/or pronghorn) winter range.

Objective [Purpose]: To protect big game winter range.

Exception: The BLM Authorized Officer may grant an exception if the operator demonstrates that the crucial habitat is not occupied during the period of concern, subject to confirmation by the IDFG and BLM; or it is determined that the action will not impair the function or suitability of the winter habitat.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based upon a BLM evaluation, in coordination with the IDFG, to determine that the big game winter range is not present or boundaries of the subject winter range areas have been refined. The stipulation may be modified based on monitoring results
Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area is not within big game winter range. This determination shall be based upon a BLM evaluation of the area, in coordination with IDFG.

DL-3644 Fo-09-B-TL Migratory Birds

TO PROTECT MIGRATORY BIRDS – [TLS] Avoid or minimize disruption of migratory bird nesting activity by siting or prioritizing vegetation clearing, facility construction, and concentrated operational activities (e.g., drilling, completion, utility installation) to avoid the involvement of higher value migratory bird habitats, particularly during the core migratory bird nesting season (April 1–July 15).

Exception: The BLM Authorized Officer may grant an exception if a staff review determines that the action will not disturb migratory bird nesting activity. This determination shall be based upon field study by a qualified representative, subject to confirmation from BLM. Confirmation may include coordination with the IDFG or USFWS.

Modification: The BLM Authorized Officer may modify the area subject to the stipulation based on local evaluation including topography, visibility, disturbance and human activity levels, and

other factors. The stipulation may be modified based on monitoring results. The determination shall be based upon field studies of the area by a qualified representative and subject to confirmation from BLM. Confirmation may include coordination with the IDFG or USFWS.

Waiver: The BLM Authorized Officer may waive this stipulation if it is determined that the entire lease area does not contain migratory bird nests. Confirmation may include coordination with the IDFG or USFWS. Affected Parcels Areas of Parcels Affected All Nominated Parcels All lands in which the BLM manages the surface estate.

DL-3658 Sa-09-A-TL Big Game Winter Habitat

Stipulation: Timing Limitation (TL) -No surface activity within big game (elk and mule deer) winter habitat from November 15 through March 15.

Objective [Purpose]: To protect big game winter habitat necessary to maintaining the critical life stages of big game populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect big game and its habitat. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that would satisfactorily offset the anticipated impacts to big game and its habitat. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area no longer contain big game winter habitat or that the proposed action would not affect the species and habitat. The dates for the timing restriction may also be modified by the Authorized Officer if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer if it is determined that the described lands do not contain suitable big game winter habitat or are otherwise incapable of serving the requirements of the species and therefore no longer warrant consideration as a component necessary for their protection. This may require consultation with the appropriate state agency.

DL-3659 Sa-03-A-TL Elk Calving Areas

Stipulation: Timing Limitation (TL) -No surface activity within elk calving areas from April 30 through June 30.

Objective [Purpose]: To protect elk calving areas necessary to maintaining the critical life stages of elk populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect elk and their habitat. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that would satisfactorily offset the anticipated impacts to elk and

their habitat. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area no longer contain elk calving areas so that the proposed action would not affect the species and habitat. The dates for the timing restriction may also be modified by the Authorized Officer if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer if it is determined that the described lands do not contain suitable elk calving areas or are otherwise incapable of serving the requirements of for the species and therefore no longer warrant consideration as a component necessary for their protection. This may require consultation with the appropriate state agency.

DL-3660 Sa-06-A-TL Raptor Nesting

Stipulation: Timing Limitation (TL) - No surface activity within 0.5 miles of a raptor nest site from March 15 through August 15.

Objective [Purpose]: To protect raptor nesting activities necessary to maintaining the critical life stages of existing raptor populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect the raptor nest sites being protected by this restriction. An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area can be occupied without adversely affecting raptor nesting activity. The dates for the timing restriction may be modified if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer, in consultation with the Idaho Department of Fish and Game, that the entire leasehold no longer contains raptor nest sites.

DL-3669 Up-09-A-TL Big Game Winter Habitat

Stipulation: Timing Limitation (TL) -No surface activity within big game (elk, mule deer, and/or moose) winter habitat from November 15 through April 30.

Objective [Purpose]: To protect big game winter habitat necessary to maintaining the critical life stages of big game populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect big game and its habitat. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that would satisfactorily offset the anticipated impacts to

big game and its habitat. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area no longer contain big game winter habitat or that the proposed action would not affect the species and habitat. The dates for the timing restriction may also be modified by the Authorized Officer if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer if it is determined that the described lands do not contain suitable big game winter habitat or are otherwise incapable of serving the requirements of the species and therefore no longer warrant consideration as a component necessary for their protection. This may require consultation with the appropriate state agency.

DL-3670 Up-01-A-TL Pronghorn Winter Habitat

Stipulation: Timing Limitation (TL) -No surface activity within pronghorn winter habitat from December 1 through April 1.

Objective [Purpose]: To protect pronghorn winter habitat necessary to maintaining the critical life stages of pronghorn populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect pronghorn and its habitat. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that would satisfactorily offset the anticipated impacts to pronghorn and its habitat. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area no longer contain pronghorn winter habitat or that the proposed action would not affect the species and habitat. The dates for the timing restriction may also be modified by the Authorized Officer if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer if it is determined that the described lands do not contain suitable pronghorn winter habitat or are otherwise incapable of serving the requirements of the species and therefore no longer warrant consideration as a component necessary for their protection. This may require consultation with the appropriate state agency.

DL-3671 Up-01-B-TL Pronghorn Fawning Grounds

Stipulation: Timing Limitation (TL) -No surface activity within pronghorn fawning habitat from May 1 through June 30.

Objective [Purpose]: To protect pronghorn fawning habitat necessary to maintaining the critical life stages of pronghorn populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect pronghorn and its habitat. An exception may also be granted if the proponent, BLM, and other affected interests negotiate mitigation that would satisfactorily offset the anticipated impacts to pronghorn and its habitat. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area no longer contain pronghorn fawning habitat or that the proposed action would not affect the species and habitat. The dates for the timing restriction may also be modified by the Authorized Officer if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer if it is determined that the described lands do not contain suitable pronghorn fawning habitat or are otherwise incapable of serving the requirements of the species and therefore no longer warrant consideration as a component necessary for their protection. This may require consultation with the appropriate state agency.

DL-3672 Up-06-A-TL Raptor Nesting

Stipulation: No Surface Occupancy (NSO) within 0.5 miles of a raptor nest site from March 15 – August 1.

Objective [Purpose]: To protect raptor nesting activities necessary to maintaining the critical life stages of existing raptor populations.

Exception: The Authorized Officer may grant an exception if an environmental review determines that the action, as proposed or otherwise restricted, does not adversely affect the raptor nest sites being protected by this restriction. An exception may also be granted if the proponent, BLM, and other affected interests, in consultation with the Idaho Department of Fish and Game, negotiate mitigation that would satisfactorily offset the anticipated impacts. An exception may be granted for actions designed to enhance the long-term utility or availability of the habitat.

Modification: The boundaries of the stipulated area may be modified if the Authorized Officer, in consultation with the Idaho Department of Fish and Game, determines that portions of the area can be occupied without adversely affecting raptor nesting activity. The dates for the timing restriction may be modified if new information indicates the dates are not valid for the leasehold.

Waiver: The restriction may be waived by the Authorized Officer, in consultation with the Idaho Department of Fish and Game, that the entire leasehold no longer contains raptor nest sites.
